Dear Mr Swinehart:

LICENSES 1065 & 6486 (APPLICATIONS 1215 & 18265) AND STATEMENT OF WATER DIVERSION AND USE 6313 LOWER CENTENIAL SPRING, UNNAMED SPRING AND BLACK ROCK SPRINGS IN INYO COUNTY

Enclosed are copies of License 6486 and Statement of Water Diversion and Use 6313 along with copies of the latest reports submitted to us per your request during our telephone conversation on this date.

In reviewing the files I found License 1065 which also serves the Cabin Bar Ranch. I have also enclosed copies of the License and reports for it.

The copies of the reports I have enclosed are the last ones we received for these files.

You probably already have noticed that the Report of Licensee is quite different from the earlier ones. We have tried to simplify them as much as possible and still obtain the required information.

Please let us know how the ownership should be shown on all the files as it appears that they should all be the same. We will then change our records accordingly. Thank you for helping us get these back on the right track.

If you have any questions, please call me at the above phone number or write me at the above address.

Sincerely,

Dear Mr. and Mrs. Grundman:

STATEMENT 6311, GRIZZLEY SLOUGH IN SACRAMENTO COUNTY

Thank you for informing us that you have acquired the property formerly owned by Robert G. Patterson which is served by the above Statement of Water Diversion and Use. As requested, we will change our records to show ownership of Statement 6311 in the names of James E. Grundman and Elizabeth K. Grundman, unless notified otherwise within 30 days.

If you have any further questions regarding your statement, please telephone Wynne Rowlands of our staff at (916) 324-5678.

Sincerely,

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

"Statements of Water Diversion and Use"
"Information Pertaining to Water Rights in California"
"Water Rights for Stockponds Constructed Prior to 1969"
"Appropriation of Water in California"
