ITEM CONTINUATION

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same water shed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by a riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

"Statements of Water Diversion and Use"
"Information Pertaining to Water Rights in California"
"Water Rights for Stockponds Constructed Prior to 1969"
"Appropriation of Water in California"

STATEMENT OF WATER DIVERSION AND USE

This statement should be typewritten or legibly written in ink.

A. Name of person diverting water: Saint Helena Water Enterprises (City of St. Helena)

Address: 1840 Main St., St. Helena, Calif., 94574

B. Name of body of water at point of diversion: York Creek

Tributary to: Napa River

C. Place of diversion: SE ¼ SW ¼ Section 26, Township 8N, Range 6W, MD B&M, Napa County, or locate it on sketch of section grid on reverse side with regard to section lines or prominent local landmarks.

D. Name of works: York Creek Diversion

E. Capacity of diversion works: 2500 ~~cubic feet per second~~ ~~gallons~~ gallons per minute

Capacity of storage reservoir: 24.44 ~~gallons~~ ~~acre-feet~~ acre-feet

State quantity of water used each month in ~~gallons~~ acre-feet

Year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
1966	3.25	0	1.80	5.15	6.88	7.35	6.58	2.65	0.98	2.18	0.45	1.73	38.96

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as acres of each crop irrigated, average number of persons served, number of stock watered, etc. 4500 people are served by the water system. There are other sources.

Maximum annual water use in recent years: 39.6 ~~gallons~~ acre-feet

Minimum annual water use in recent years: 23.9 ~~gallons~~ acre-feet

Type of diversion facility: gravity X, pump

Method of measurement: weir, flume, electric power meter, water meter X, estimate

F. Purpose of use (what water is being used for): Municipal Water System

G. General description or location of place of use (use sketch of section grid on reverse side if you desire): City of St. Helena

H. Year of first use as nearly as known: 1878

I. Name of person filing statement: Charles A. Johnson

Position: Director of Public Works Organization: City of St. Helena

Address: 1840 Main St., St. Helena
