GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

Ms Donna Kramer

The enclosed information is provided in response to your telephone inquiry to me on 12-8-92. The only record in our files under the name Terry Ward Kramer is a statement of water diversion and use Number 1102, Pollock Gulch, Siskiyou Co filed June 13, 1967. A copy of the file is provided for your records.

The supplemental three year period statement for 1985-86-87 is missing. The most recent record is for 1988-89-90. The next report will be mailed to the Diverter of Record in January 1994 for the three year period 1991-92-93.

Please note that a statement of diversion and use under riparian claim is not a water right. (See literature included - The Water Right Process & Water Code 5100 et seq)

If you wish to change the name of the Diverter of Record please notify Mr Wynne Rowlands, Division of Water Rights PO Box 2000 Sacramento Ca 95812.

I hope this information meets your needs.

Sincerely

Tom Lavanda P.E.
