ITEM	CONTINUATION

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

SOURCE: PIT RIVER

TRIBUTARY TO: SACRAMENTO RIVER

COUNTY: LASSEN

DIVERSION
WITHIN: NW1/4 OF SE1/4 SECTION 20, T37N, R06E, MDB&M.

INSTRUCTIONS: Please complete Items A. B and C. Item D should be completed if you replaced all or part of your regular water supply with reclaimed or polluted water. RETURN THIS FORM BY JULY 1, 1991. (Additional information on reverse side of this form.)

A. Amount of Use - Fill in the amount of water used each month. If monthly and annual use are not known, check the months in which water was used.

Amounts below are: ☐ Gallons ☐ Acre-feet ☐ _____ (other)

	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
1988	X	X	X	X	X	X	X	X	X	X	X	X	
1989	X	X	X	X	X	X	X	X	X	X	X	X	
1990	X	X	X	X	X	X	X	X	X	X	X	X	

B. Purpose of Use - Specify number of acres irrigated, stock watered, persons served, etc.

Irrigation APPROX 35 ACRES

Stockwatering 30 HEAD

Domestic

Other (specify)

C. Changes in Method of Diversion - Describe any changes in your project since your previous statement was filed. (New pump, enlarged diversion dam, location of diversion, etc.)

D. If part of the water listed in Part A consists of reclaimed or polluted water, please indicate the annual amounts of reclaimed or polluted water in the space below.

I declare under penalty of perjury that the information in this report is true to the best of my knowledge and belief.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

(And From)

The RRN is in receipt of a copy of a letter sent to PG&E from the Federal Energy Regulatory Commission. Because our policy is to keep the community aware of proceedings concerning Lake McCumber, we are printing this letter.

Sept. 6, 1988

"We are inquiring about allegations that Macumber Reservoir is not being operated in accordance with the requirements of article 33 of the license for the Battle Creek Project. These allegations are included as attachment A.

Article 33 requires that Macumber Reservoir be maintained at full capacity during the annual recreation season from April 1 through September 10. Exceptions to this regime may be made only for purposes of maintaining a 0.3 cfs minimum flow release from Macumber Reservoir, for maintenance and repair of project works, or for emergencies. It is alleged that the reservoir is being drawn down to extremely low levels because the discharge from the reservoir is, and has been, much higher than the required 0.3 cfs.

The reservoir water level has dropped, at times, to at least 59 inches below the spillway crest (see attachment A). Although inflow to the reservoir has been increased as evidenced in your letters dated July 25 and July 28, 1988, we continue to receive reports that the reservoir surface elevation continues to drop and that fish kills persist.

You are directed to file, within 15 days from the receipt of this letter, a report that includes a complete explanation of the allegations. The report should include necessary inflow and outflow data and water surface elevations, to demonstrate how Macumber Reservoir has been operated since April 1, 1988. The submittal should be made in triplicate to.....

Also, send one copy to.....

Filing of the above report in no way precludes the commission from assessing penalties or initiating enforcement action regarding non-compliance with article 33 should you have violated the conditions of your license. This letter constitutes notice pursuant to section 31 (a) of the Federal Power Act.

Sincerely,

J. Mark Robinson, Director
Compliance & Administration"

STATEMENT OF WATER DIVERSION AND USE

This statement should be typewritten or legibly written in ink.

A. Name of person diverting water George R. Duncan
Address Pittville Rt. McArthur 96052

B. Name of body of water at point of diversion Pit River
Tributary to Sacramento

C. Place of diversion NW ¼ SE ¼ Section 20, Township 37N, Range 6E, MD B&M
Lassen County, or locate it on sketch of section grid on reverse side with regard to section lines or prominent local landmarks.

D. Name of works Pump 10 H.P.

E. Capacity of diversion works 160 cubic feet per second, gallons per minute
Capacity of storage reservoir ..... gallons, acre-feet
State quantity of water used each month in gallons or acre-feet

Year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total
1966				18	20	20	21	21	20	10			130

If monthly and annual use are not known, check months in which water was used. State extent of use in acres, number of acres of each crop irrigated, average number of persons served, number of stock watered, etc.

Maximum annual water use in recent years 150 gallons, acre-feet
Minimum annual water use in recent years 120 gallons, acre-feet
Type of diversion facility: gravity ....., pump X
Method of measurement: weir ....., flume ....., electric power meter ....., water meter ....., estimate Rated Pump Capacity

F. Purpose of use (what water is being used for) Irrigation of Crops + Pasture
Water Cattle

G. General description or location of place of use (use sketch of section grid on reverse side if you desire)
River Bank about 6 Ft N. of ¼ Sec Line of Sec 20

H. Year of first use as nearly as known 1900

I. Name of person filing statement George R. Duncan
Position owner Organization .....
Address Pittville Rt. McArthur

I certify that the foregoing statement is true and correct to the best of my knowledge and belief.

Date signed 6/19/67 Signature George R. Duncan
