GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

STATEMENT OF WATER DIVERSION AND USE

This statement should be typewritten or legibly written in ink.

S 1907

A. Name of person diverting water: Pylman Bros.

Address: Rte. 1 Box 319, Clarksburg, Calif., 95612

B. Name of body of water at point of diversion: Elk Slough

Tributary to: Sacramento River

C. Place of diversion ____ ¼ ____ ¼ Section 29, Township 6 N, Range 4 E, Yolo County, or locate it on sketch of section grid on reverse side with regard to section lines or prominent local landmarks.

D. Name of works

E. Capacity of diversion works: 2500 gallons per minute

Capacity of storage reservoir: ____ gallons / acre-feet

State quantity of water used each month in gallons or acre-feet

Year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
				X	X	X	X	X	X				

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as acres of each crop irrigated, average number of persons served, number of stock watered, etc. 208 acres asparagus

Maximum annual water use in recent years ____ gallons / acre-feet

Minimum annual water use in recent years ____ gallons / acre-feet

Type of diversion facility: gravity ____, pump X

Method of measurement: weir ____, flume ____, electric power meter ____, water meter ____, estimate X

F. Purpose of use (what water is being used for): irrigation

G. General description or location of place of use (use sketch of section grid on reverse side if you desire): two miles south of Road 142 on Elk Slough

H. Year of first use as nearly as known: 1915

I. Name of person filing statement: Thornton E. Pylman

Position: Partner

Organization: Pylman Bros.

Address: [illegible]

I certify that the foregoing statements are true and correct to the best of my knowledge and belief.

Date signed: June 27, 1967
