ITEM	CONTINUATION

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

STATEMENT OF WATER DIVERSION AND USE

This statement should be typewritten or legibly written in ink.

A. Name of person diverting water Mary Margaret Springston
Address P.O. Box 151, Middletown, Ca 95461 (Socrates Mine Road)

B. Name of body of water at point of diversion Gunning Creek
Tributary to Anderson Creek, thence Putah Creek, Thence Berryessa

C. Place of diversion NW ¼ NE ¼ Section 26, Township 11N, Range 8W., M.D.B.&M.
Lake County County, or locate it on sketch of section grid on reverse side with regard to section lines or prominent local landmarks.

D. Name of works Pipeline

E. Capacity of diversion works 3-inch pipeline = 20 Gallons per Min. approximately (cubic feet per second / gallons per minute)
Capacity of storage reservoir ..... (gallons / acre-feet)
State quantity of water used each month in gallons or acre-feet

Year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
annually	X	X	X	X	X	X	X	X	X	X	X	X	not known

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as acres of each crop irrigated, average number of persons served, number of stock watered, etc. domestic use
Riparian right by judgment of Lake Co. Superior Court. Present uses do not limit future uses or quantities
Maximum annual water use in recent years impossible to tell (gallons / acre-feet)
Minimum annual water use in recent years impossible to tell (gallons / acre-feet)
Type of diversion facility: gravity X, pump .....
Method of measurement: weir ....., flume ....., electric power meter ....., water meter ....., estimate X

F. Purpose of use (what water is being used for) domestic - present uses do not limit those of the future

G. General description or location of place of use (use sketch of section grid on reverse side if you desire)
Section 25 T.11 N.w R.8 West - M.D.B.&M.

H. Year of first use as nearly as known March 28, 1913 and before

I. Name of person filing statement Mary Margaret Springston
Position semi-retired Organization .....
Address P.O. Box 151, Middletown, Ca. 95461

I certify that the foregoing statements are true and correct to the best of my knowledge and belief.

Date signed Feb. 21, 1970 Signature Mrs. Mary Margaret Springston
