GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriations have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

STATEMENT OF WATER DIVERSION AND USE

(This is not a Water Right)

This statement should be typewritten or legibly written in ink.

A. Name of person diverting water L. E. BRAUN

Address 145 N. 11th Chowchilla CA. 93610 Telephone: 209-665-3574

B. Name of body of water at point of diversion EAST FORK SCOTT RIVER

Tributary to MIDDLE TRIB OF KLAMATH RIVER ALSO FROM GOOSE CREEK

C. Place of diversion SW ¼ NW ¼ Section 18, Township 40N, Range 7W, MD B&M, SISKIYOU County, or locate it on sketch of section grid on reverse side with regard to section lines or prominent local landmarks.

D. Name of works

E. Capacity of diversion works _____ cubic feet per second / gallons per minute

Capacity of storage reservoir _____ gallons / acre-feet

State quantity of water used each month in gallons or acre-feet

Year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
					✓	✓	✓	✓	✓	✓			

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as acres of each crop irrigated, average number of persons served, number of stock watered, etc.

14 acres of pasture

Maximum annual water use in recent years _____ gallons / acre-feet

Minimum annual water use in recent years _____ gallons / acre-feet

Type of diversion facility: gravity ✓, pump ____

Method of measurement: weir ____, flume ____, electric power meter ____, water meter ____, estimate ✓

F. Purpose of use (what water is being used for)

irrigation pasture

G. General description or location of place of use (use sketch of section grid on reverse side if you desire)

S.W. 80 acres See 18 Range 8 W

H. Year of first use as nearly as known 60-70 yrs ago

I. Name of person filing statement L E Braun M.D.

Position Owner Organization

Address 145 N. 11th Chowchilla Calif 93610 Telephone: 209-665-3574

I declare under penalty of perjury that the above is true and correct to the best of my knowledge and belief.
