Dear Mr. and Mrs. Rossi:

REVOCATION OF CERTIFICATE R486 (SMALL DOMESTIC USE REGISTRATION D030925R)

The subject Small Domestic Use Registration, Certificate R486 has been revoked for failure to submit a renewal report and to pay the renewal fee subject to Water Code section 1228.5(d). This is a final action not subject to reconsideration by the State Water Resources Control Board (State Water Board).

This Division of Water Rights notified you of the renewal requirement of your certificate every five years on July 6 and October 20, 2004. You contacted Division staff on January 12, 2005 by telephone and expressed your desire to proceed with the project. Even though the certificate expired in 2004, you were given an opportunity to submit the renewal request report.

On February 23, 2007, and again on March 7, 2007, Division staff attempted to contact you regarding the status of your registration. Both letters were returned by the post office as undeliverable. On July 17, 2007, you were sent a certified letter to the above address, which was returned to the Division unclaimed. According to El Dorado County Assessor's office this is the correct mailing address for APN 093-040-46-100 for which you are listed as owner.

If the Registrant has constructed any of the project facilities, it is the Registrant's responsibility to remove or modify any diversion works and/or impoundments to ensure that water is no longer diverted. Please consult with the Department of Fish and Game and the Regional Water Quality Control Board in order to ensure that removal of project facilities does not adversely affect a fishery or result in unregulated sediment discharge to a waterway. These agencies may require you to obtain a permit prior to any construction activity.

Pursuant to Water Code section 1052, any diversion of water from the point of diversion identified in this certificate may be subject to administrative civil liability of up to \$500 per day without further notice. The State Water Board also may issue a cease and desist order in response to an unauthorized diversion or threatened unauthorized diversion pursuant to Water Code section 1831.

If diversions will be made under claim of riparian or pre-1914 appropriative rights, diversions shall be documented by the filing of a Statement of Water Diversion and Use in accordance with Water Code sections 5100 through 5108.

Jane Ling is the staff person presently assigned to this matter. Please contact Ms. Ling at (916) 341-5335 if you require further assistance.

DIVISION OF WATER RIGHTS

SMALL DOMESTIC USE REGISTRATION

CERTIFICATE NO. R 486

Application D30925R Randy and Sherri L. Rossi
11750 Quail Bar Road
Gold River, CA 95670

filed with the State Water Resources Control Board (SWRCB) on **July 29, 1999** meets the requirements for registration of small domestic use specified in Article 2.7 (commencing with Section 1228) of Chapter 1 of Part 2 of Division 2 of the Water Code. The appropriation is subject to the following conditions.

1. Source	Tributary to:
<u>Unnamed Stream</u>	<u>Jack Ass Canyon Creek thence</u>
	<u>North Fork Cosumnes River thence</u>
	<u>Mokelumne River thence</u>
	<u>San Joaquin River</u>

within the **County of El Dorado**

2. Location of Point of Diversion: By California Coordinate System, Zone 2	Point is within (40-acre subdivision)	Section	Township	Range	Base and Meridian
North 354, 150 feet East 2,393,700 feet	NE ¼ of SW ¼	14	9N	12E	MD

3. Purpose of Use:	4. Place of Use:	Section	Township	Range	Base and Meridian	Acres
DOMESTIC	NE ¼ of SW ¼	14	9N	12E	MD	.5

The place of use is shown on a map on file with the SWRCB.

5. The water appropriated shall be limited to the quantity which can be beneficially used and shall not exceed 5 acre-feet per annum to be collected from November 1 of each year to June 15 of the succeeding year. The capacity of the reservoir shall not exceed 5 acre-feet which is the stated capacity shown in the registration.

6. Appropriation of water pursuant to this registration shall be made in accordance with the information set forth in the completed registration form as to source, location of point of diversion, purpose of use, place of use, and quantity and season of diversion. This information is reproduced as conditions 1 through 5 of this certificate.

7. The appropriation registered herein shall be limited to the use of water in houses, resorts, motels, organization camps, campgrounds, and other similar facilities, including the incidental watering of domestic stock for family sustenance or enjoyment, the irrigation of not to exceed one-half acre of lawn, ornamental shrubbery, or gardens at any single establishment, and the human consumption, cooking, and sanitary needs at campgrounds or resorts.

8. Any storage of water registered herein may include impoundment for incidental aesthetic, recreational, or fish and wildlife purposes.

9. This appropriation is limited to the season of diversion specified in condition 5 herein. If such specified season is less than the actual season of need, an alternative supply of water, or other valid right, shall be utilized for all uses outside of the season registered herein.

10. Pursuant to California Water Code sections 100 and 275 and the common law public trust doctrine, all rights and privileges under this registration, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the SWRCB in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

11. This appropriation is subject to prior rights. Registrant may be required to curtail diversion or release water stored during the most recent collection season should diversion under this registration result in injury to holders of legal downstream senior rights. If a reservoir is involved, registrant may be required to bypass or release water through, over, or around the dam. If release of stored water would not effectively satisfy downstream prior storage rights, registrant may be required to otherwise compensate the holders of such rights for injury caused.

12. Registrant shall allow representatives of the SWRCB, and other parties as may be authorized from time to time by the SWRCB, reasonable access to project works to determine compliance with the terms and conditions of this registration.

13. If the registrant does not own the point of diversion, this registration shall not be construed as conferring upon the registrant right of access to the point of diversion.

14. To the extent that water available for use under this registration is return flow, imported water, or wastewater, this registration shall not be construed, as giving any assurance that such supply will continue.

15. Diversion works shall be constructed and water applied to beneficial use with due diligence.

16. In accordance with sections 1600 through 1607 and 6100 of the Fish and Game Code, no work shall be started on the diversion works and no water shall be diverted until registrant has entered into a stream or lake alteration agreement with the California Department of Fish and Game and/or the Department has determined that measures to protect fishlife have been incorporated into the plans for construction of such diversion works. Construction, operation, and maintenance costs of any required facility are the responsibility of the registrant.

17. In compliance with section 5937 of the Fish and Game Code, if storage or diversion of water under this registration is by means of a dam, registrant shall allow sufficient water at all times to pass through a fishway or, in the absence of a fishway, allow sufficient water to pass over, around, or through the dam to keep in good condition any fish that may be planted or exist below the dam; provided that, during a period of low flow in the stream, upon approval of the California Department of Fish and Game, this requirement will be satisfied if sufficient water is passed through a culvert, waste gate, or over or around the dam to keep in good condition any fish that may be planted or exist below the dam if it is impracticable or detrimental to pass the water through a fishway. In the case of a reservoir, this provision shall not require the passage or release of water at a greater rate than the unimpaired natural inflow into the reservoir.

18. The facilities for diversion under this registration shall include satisfactory means of measuring and bypassing sufficient water to satisfy downstream prior rights and any requirements of the California Department of Fish and Game.

19. No construction shall be commenced and no water shall be diverted under this registration until all necessary federal, state, and local approvals have been obtained, including obtaining and complying with any waste discharge requirements from the appropriate California Regional Water Quality Control Board.

20. This registration does not authorize any act which results in the taking of a threatened or endangered species or any act which is now prohibited, or becomes prohibited in the future, under either the California Endangered Species Act (Fish and Game Code sections 2050 to 2097) or the federal Endangered Species Act (16 U.S.C.A. sections 1531 to 1544). If a "take" will result from any act authorized under this water right, the registrant shall obtain an incidental take permit prior to construction or operation. Registrant shall be responsible for meeting all requirements of the applicable Endangered Species Act for the project authorized under this registration.

21. This registration is subject to the submittal of a report of water use and satisfactory renewal of the registration, on forms to be furnished by the SWRCB, including payment of the then-current renewal fees prior to the expiration of each five-year period following the date of first filing the completed registration.

22. The point or points of diversion and the place of use registered herein may be changed by filing a completed amended registration form with the SWRCB, including payment of the then-current registration fee. Such change shall not operate to the injury of any legal user of the water involved.

23. The appropriation registered herein shall be totally or partially forfeited for nonuse if the diversion is abandoned or if all or any part of the diversion is not beneficially used for a continuous period of five years.

24. The appropriation registered herein is subject to enforcement, including but not limited to revocation, by the SWRCB 1) the SWRCB finds that the registrant knowingly made any false statement, or knowingly concealed any material fact, in the registration; 2) the registration is not renewed as required by the conditions of this certificate; or 3) the SWRCB finds that the registrant is in violation of the conditions of this registration.

25. In the event that water is to be collected to storage under this registration, the Registrant shall install and maintain an outlet pipe of adequate size and capacity through the dam, as near as practicable to the bottom of the natural stream channel so that water that is not authorized for collection to storage can be bypassed through the dam. In the event that the dam is already constructed, registrant shall provide other means satisfactory to the Chief of the Division of Water Rights for bypassing water. Before storing water in the reservoir, registrant shall provide evidence that substantiates that the outlet pipe or other means of bypassing water has been installed. Evidence shall include photographs showing the completed works or a certification by a registered engineer. The facilities shall be maintained and operated to ensure compliance with the terms of this registration.

Dated: **DEC 12 1999**
