

STATE OF CALIFORNIA
CALIFORNIA ENVIRONMENTAL PROTECTION AGENCY
STATE WATER RESOURCES CONTROL BOARD

DIVISION OF WATER RIGHTS

Amended License for Diversion and Use of Water

APPLICATION 1589
Page 1 of 4

PERMIT 1885

LICENSE 3067

THIS IS TO CERTIFY, That

Reclamation District No. 108
P.O. Box 50
Grimes, CA 95950

has the right to the use of the waters of **Sacramento River** in **Yolo and Colusa Counties**
tributary to **Suisun Bay**
for the purpose of **Irrigation use**.

The Deputy Director for Water Rights finds that: (a) the change will not operate to the injury of any lawful user of water; (b) good cause has been shown for the change; (c) the petition does not constitute the initiation of a new right; and (d) the State Water Resources Control Board (State Water Board) has made the required findings pursuant to the California Environmental Quality Act (CEQA) or the project is exempt from CEQA.

Additionally, the State Water Board has complied with its independent obligation to consider the effect of the proposed project on public trust resources and to protect those resources where feasible. (*National Audubon Society v. Superior Court* (1983) 33 Cal.3d 419 [189 Cal.Rptr. 346], 658 P.2d 709.)

This amended license is being issued in accordance with the redelegations of authority (Resolution No. 2007-0057). Therefore, this amended license on **Application 1589** filed on **December 26, 1919**, has been approved by the State Water Board SUBJECT TO PRIOR RIGHTS and to the limitations and conditions herein.

Amended License 3067 supersedes the license originally issued on **February 24, 1950**, which was perfected in accordance with the laws of California, the Regulations of the State Water Board, or its predecessor, and the terms of **Permit 1885**. The priority of this right dates from **December 26, 1919**. Proof of maximum beneficial use of water under this license was made as of **June 15, 1949** (the date of inspection).

The amount of water to which this right is entitled and hereby confirmed is limited to the amount actually beneficially used for the stated purposes and shall not exceed **two hundred fifty-five and twenty-five hundredths (255.25) cubic-feet per second to be diverted from May 1 to October 1 of each year, provided however, that the total amount diverted hereunder and under Licenses 3065 and 3066 (Applications 576 and 763) shall not exceed seven hundred twenty-five (725) cubic-feet per second.**

The total quantity of water diverted under this license, Licenses 3065 and 3066 (Applications 576 and 763), riparian claims and Central Valley Project water entitlements under Sacramento River Settlement Contract with the U.S. Bureau of Reclamation (Contract No. 14-06-200-876A), shall not exceed 232,000 acre-feet during the period from February 1 to October 31 of each year.

The equivalent of such continuous flow for any thirty (30) day period may be diverted in a shorter time if there is no interference with vested rights.

THE POINTS OF DIVERSION OF SUCH WATER ARE LOCATED:

- (1) Wilkins Slough Plant - By California Coordinate System of 1983, Zone 2, North 2,130,572 feet and East 6,610,675 feet, being within SW $\frac{1}{4}$ of SE $\frac{1}{4}$ of projected Section 35, T14N, R1E, MDB&M.
- (2) Steiner Bend North Plant - By California Coordinate System of 1983, Zone 2, North 2,125,881 feet and East 6,617,851 feet, being within SE $\frac{1}{4}$ of SE $\frac{1}{4}$ of projected Section 1, T13N, R1E, MDB&M.
- (3) Steiner Bend South Plant - By California Coordinate System of 1983, Zone 2, North 2,122,208 feet and East 6,613,791 feet, being within NW $\frac{1}{4}$ of SW $\frac{1}{4}$ of projected Section 12, T13N, R1E, MDB&M.
- (4) Emery Poundstone Pumping Plant - By California Coordinate System of 1983, Zone 2, North 2,105,148 feet and East 6,608,242 feet, being within SW $\frac{1}{4}$ of SW $\frac{1}{4}$ of projected Section 26, T13N, R1E, MDB&M.
- (5) El Dorado Bend Plant - By California Coordinate System of 1983, Zone 2, North 2,073,781 feet and East 6,622,603 feet, being within NE $\frac{1}{4}$ of SE $\frac{1}{4}$ of projected Section 30, T12N, R2E, MDB&M.

A DESCRIPTION OF THE LANDS OR THE PLACE WHERE SUCH WATER IS PUT TO BENEFICIAL USE IS AS FOLLOWS:

A net of 22,663 acres irrigated in any one year hereunder and under Licenses 3065 and 3066 within a gross area of 38,510 acres, all within the service area of Reclamation District No. 108 within T11N, R1E; T12N, R1 and R2E; T13N, R1W and 1E; and T14N, R1W and 1E, MDB&M, as shown on map dated April 17, 2007 filed with the State Water Board.

No water shall be diverted under this license unless the licensee has installed devices, satisfactory to the Deputy Director for Water Rights, which are capable of measuring the diversions. The measuring devices shall be properly maintained.

If it is determined after license issuance that the as-built conditions of the project are not correctly represented by the maps prepared to accompany the application, the licensee shall, at his expense, have the subject maps updated or replaced with equivalent as-built maps. The revision or new map shall be prepared by a civil engineer or land surveyor registered or licensed in the State of California and shall meet the requirements prescribed in section 715 and sections 717 through 723 of the California Code of Regulations, Title 23. The revision or map shall be furnished upon request of the Deputy Director for Water Rights.

(0000030)

The right hereby confirmed to the diversion and use of water is restricted to the point or points of diversion herein specified and to the lands or place of use herein described.

Reports shall be filed promptly by the licensee on the appropriate forms which will be provided for the purpose from time to time by the State Water Board.

Licensee shall allow representatives of the State Water Board and other parties, as may be authorized from time to time by the State Water Board, reasonable access to project works to determine compliance with the terms of this license.

Pursuant to Water Code sections 100 and 275 and the common law public trust doctrine, all rights and privileges under this license, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the State Water Board may be exercised by imposing specific requirements over and above those contained in this license with a view to eliminating waste of water and to meeting the reasonable water requirements of licensee without unreasonable draft on the source. Licensee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this license and to determine accurately water use as against reasonable water requirement for the authorized project. No action will be taken pursuant to this paragraph unless the State Water Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the State Water Board also may be exercised by imposing further limitations on the diversion and use of water by the licensee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the State Water Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution article X, section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.

The quantity of water diverted under this license is subject to modification by the State Water Board if, after notice to the licensee and an opportunity for hearing, the State Water Board finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to division 7 of the Water Code. No action will be taken pursuant to this paragraph unless the State Water Board finds that: (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot be achieved solely through the control of waste discharges.

This license does not authorize any act which results in the taking of a threatened or endangered species or candidate species or any act which is now prohibited, or becomes prohibited in the future, under either the California Endangered Species Act (Fish and Game Code sections 2050 to 2089) or the federal Endangered Species Act (16 U.S.C.A. sections 1531 to 1544). If a "take" will result from any act authorized under this water right, the licensee shall obtain authorization for an incidental take prior to construction or operation of the project. Licensee shall be responsible for meeting all requirements of the state or federal Endangered Species Acts for the project authorized under this license.

If construction or rehabilitation work is required for the diversion works covered by this license within the bed, channel, or bank of the affected water body, the licensee shall enter into a streambed or lake alteration agreement with the State Department of Fish and Game. Licensee shall submit a copy of the agreement, or waiver thereof, to the Division of Water Rights prior to commencement of work. Compliance with the terms and conditions of the agreement is the responsibility of the licensee.

This license is granted and the licensee accepts all rights herein confirmed subject to the following provisions of the Water Code:

Section 1625. Each license shall be in such form and contain such terms as may be prescribed by the State Water Board.

Section 1626. All licenses shall be under the terms and conditions of this division (of the Water Code).

Section 1627. A license shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code) but no longer.

Section 1628. Every license shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article (of the Water Code) and the statement that any appropriator of water to whom a license is issued takes the license subject to the conditions therein expressed.

Section 1629. Every licensee, if he accepts a license, does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefore shall at any time be assigned to or claimed for any license granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any licensee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any licensee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).

Section 1630. At any time after the expiration of twenty years after the granting of a license, the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State shall have the right to purchase the works and property occupied and used under the license and the works built or constructed for the enjoyment of the rights granted under the license.

Section 1631. In the event that the State, or any city, city and county, municipal water district, irrigation district, lighting district, or political subdivision of the State so desiring to purchase and the owner of the works and property cannot agree upon the purchase price, the price shall be determined in such manner as is now or may hereafter be provided by law for determining the value of property taken in eminent domain proceedings.
