STATE WATER RESOURCES CONTROL BOARD  
**DIVISION OF WATER RIGHTS**

**ORDER**

APPLICATION 10739 PERMIT 6239 LICENSE 3141

ORDER ALLOWING THE ADDITION OF A POINT OF DIVERSION  
AND AMENDING THE LICENSE

**WHEREAS:**

1. License 3141 was issued to Bridge Investment Company and was filed with the County Recorder of Sutter County on March 17, 1951.
2. License 3141 was subsequently assigned to Danna & Danna, Inc., Tudor Ranch Company, and Oji Brothers Farm, Inc.
3. A petition for change to add a point of diversion, has been filed with the State Water Resources Control Board and said Board has determined that good cause for such change has been shown.
4. The Board has determined that the petitioned change does not constitute the initiation of a new right nor operate to the injury of any other lawful user of water.
5. The license condition pertaining to the Board's continuing authority should be revised to conform with Section 780(a), Title 23 of the California Code of Regulations.

**NOW, THEREFORE, IT IS ORDERED THAT:**

1. The points of diversion under this license shall be as follows:
  - 1) South 41° 30' West 750 feet from N $\frac{1}{4}$  corner of Section 1, T13N, R2E, MDB&M, being within NE $\frac{1}{4}$  of NW $\frac{1}{4}$  of said Section 1. Also described by California Coordinate System, Zone 2, N 489,100 and E 2,085,400; and

2. The license condition pertaining to the Board's continuing authority is amended to conform with Section 780(a), Title 23, of the California Code of Regulations and reads:

Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this license, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this license with a view to eliminating waste of water and to meeting the reasonable water requirements of licensee without unreasonable draft on the source. Licensee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this license and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the licensee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.
