

STATE OF CALIFORNIA
STATE WATER RESOURCES CONTROL BOARD
DIVISION OF WATER RIGHTS

ORDER

APPLICATION 11545 PERMIT 6716 LICENSE 3328

ORDER CORRECTING THE DESCRIPTION OF THE
POINT OF DIVERSION AND
AMEND THE LICENSE

WHEREAS:

1. License 3328 was issued to John C. Shreck and Mae J. Shreck and filed with the County Recorder of Nevada County on January 15, 1952.
2. License 3328 was subsequently assigned to Orval L. Shreck and Helen L. Shreck.
3. An inspection was made on June 20, 1992 and it was determined that the description of the point of diversion should be corrected. The correction is needed to correctly describe the location of the spring used as a source of water for domestic use.
4. The State Water Resources Control Board has determined that said correction in the description of point of diversion will not initiate a new right nor operate to the injury of any other lawful user of the water and that good and sufficient cause has been shown for said correction.
5. The license condition pertaining to the continuing authority of the State Water Board should be updated to conform to Section 780(a), Title 23 of the California Code of Regulations.

NOW, THEREFORE, IT IS ORDERED THAT:

1. The point of diversion under License 3328 be described as follows:

North 250 feet and West 1,150 feet from the SE corner of Section 12, T17N, R15E, MDB&M, being within the SE $\frac{1}{4}$ of SE $\frac{1}{4}$ of said Section 12 (California Coordinate System, Zone 2, N 610,500 and E 2,493,000).

2. The condition pertaining to the continuing authority of the State Water Board is amended to read:

Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this license, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.
