Amended **License 5625A** supersedes the license originally issued on **April 9, 1959**, which was perfected in accordance with the laws of California, the regulations of the State Water Resources Control Board (SWRCB) or its predecessor, and the terms of **Permit 8556**. The priority of this right dates from **November 15, 1950**. Proof of maximum beneficial use of water pursuant to **Application 14050** was made as of **August 7, 1958** (the date of inspection).

The amount of water that may be used under this license is limited to the amount actually beneficially used for the stated purposes and shall not exceed **6,500 gallons per day by direct diversion to be diverted from about May 1 to about October 31 of each year not to exceed 3.6 acre feet per annum**.

The equivalent of such continuous flow allowance for any thirty-day period maybe diverted in a shorter time if there is no interference with other vested rights.

No action will be taken pursuant to this paragraph unless the SWRCB finds that: (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot be achieved solely through the control of waste discharges.

Pursuant to California Water Code Sections 100 and 275 and the common law public trust doctrine, all rights and privileges under this license, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the SWRCB in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use or unreasonable method of diversion of said water.

The continuing authority of the SWRCB also may be exercised by imposing further limitations on the diversion and use of water by the licensee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the SWRCB determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution article X, section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.

This license does not authorize any act which results in the taking of a threatened or endangered species or any act which is now prohibited, or becomes prohibited in the future, under either the California Endangered Species Act (Fish and Game Code sections 2050 to 2097) or the federal Endangered Species Act (16 U.S.C.A. sections 1531 to 1544). If a "take" will result from any act authorized under this water right, the licensee shall obtain authorization for an incidental take prior to construction or operation of the project. Licensee shall be responsible for meeting all requirements of the applicable Endangered Species Act for the project authorized under this permit.

Reports shall be filed promptly by licensee on appropriate forms which will be provided for the purpose from time to time by the SWRCB.
