In the Matter of License 6203 (Application 17064)

Anthony Truchard and Jo Ann Truchard

ORDER REVOKING LICENSE

SOURCE: Unnamed Stream

COUNTY: Napa

WHEREAS:

1. License 6203 was issued to Ghisletta Brothers on March 7, 1961, pursuant to Application 17064 and was recorded by the County Recorder of Napa County on March 8, 1961, in Volume 626, Page 274.
2. License 6203 was subsequently assigned to Anthony Truchard and Jo Ann Truchard on January 23, 2002.
3. Anthony Truchard requested on August 5, 2010, that the License be revoked by the State Water Resources Control Board (State Water Board), Division of Water Rights (Division). Mr. Truchard reported that the reservoir covered by License 6203 is covered by Permit 21095 (Application 30561) for irrigation of grapes.
4. The Division interprets the Licensee's request for revocation as a waiver of the notice and hearing requirements set forth in Water Code sections 1675 through 1675.1.

Therefore, it is ordered that License 6203 is hereby revoked by the State Water Board, and the water is declared to be subject to appropriation. This revocation may not result in additional water being available for new appropriations if there are applicable restrictions due to past State Water Board decisions regarding water availability.

ORDER CORRECTING POINT OF DIVERSION AND AMENDING LICENSE

WHEREAS:

1. License 6203 was issued to the Ghisletta Brothers on March 7, 1961 pursuant to Application 17064 and filed with the County Recorder of Napa County in Document Z4461, Volume 626, Page 274 on March 8, 1961.
2. License 6203 was subsequently assigned to Burt F. Raynes.
3. A review of the project area under License 6203 was conducted by the State Water Resources Control Board staff on July 14, 1992. Staff recommended that the description for the point of diversion should be corrected to correspond to the site located within the projected Section 16, T5N, R4W, MDB&M of the U.S. Geological Survey (7.5') quadrangle map - Napa.
4. The State Water Resources Control Board (State Water Board) has determined that said correction will not constitute a new right nor operate to the injury of any other lawful user of water and that good and sufficient cause has been shown for said correction.
5. The Napa County Recorder should be notified of the corrective action.
6. The license condition pertaining to the State Water Board's continuing authority should be replaced with the current version to conform with Section 780, Title 23, of the California Code of Regulations.

NOW, THEREFORE, IT IS ORDERED THAT:

1. The description of the point of diversion under this license be corrected to read:

South 2200 feet and East 800 feet from NW corner of projected Section 16, T5N, R4W, MDB&M, being within the SW $\frac{1}{4}$ of NW $\frac{1}{4}$ of said Section 16; also described as California Coordinate System, Zone 2, N 223,700 and E 1,910,100.

3. The existing continuing authority condition in License 6203 be amended to read:

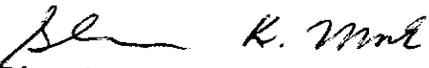

Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the use protectet by the public trust.
