STATE WATER RESOURCES CONTROL BOARD
DIVISION OF WATER RIGHTS

ORDER

APPLICATION 17305

PERMIT 11838

LICENSE 7073

ORDER CORRECTING NAME OF SOURCE
AND AMENDING LICENSE

WHEREAS:

1. License 7073 was issued to the United States Tahoe National Forest and recorded with the County Recorder of Nevada County on Volume 372, Page 462 on January 15, 1965.
2. An inspection of the project was conducted by the State Water Resources Control Board (State Water Board) staff on June 3, 1992. Staff recommended the name of East Boca Spring be corrected to unnamed spring.
3. The USGS 7.5' Quadrangle map - Boca California Nevada photorevised 1969 shows the source as being an unnamed spring. A correction in the description of source under said license is needed to conform the description with the location on the photorevised quadrangle map.
4. The State Water Board has determined that said correction in the description of the source will not initiate a new right nor operate to the injury of any other lawful user of the water and that good and sufficient cause has been shown for said correction.
5. The license condition pertaining to the continuing authority of the State Water Board does not conform to the current common law public trust doctrine as contained in Title 23, California Code of Regulations.

NOW, THEREFORE, IT IS ORDERED THAT:

1. The description of the source under this license be corrected to read:

Unnamed Spring tributary to East Boca Canyon thence Boca Reservoir.

2. The existing continuing authority condition in License 7073 be amended to read.

Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.
