THIS IS TO CERTIFY, That Montesol Company, A Partnership
414 Mason Street. Suite 802
San Francisco, CA 94102

Has the right to use waters of Cassidy Creek in Lake County tributary to Bucksnot Creek thence Putah Creek

for the following purposes: Stockwatering, Mining, Recreational, Fire Protection

Amended License 10626 supersedes the license originally issued 04/23/1976, which was perfected in accordance with the laws of California, the regulations of the SWRCB or its predecessor, and the terms of Permit 16121. The priority of this right dates from 10/31/1969. Proof of maximum beneficial use of water pursuant to Application 23386 was made as of 10/10/1975 (the date of inspection).

The amount of water that may be used under this license is limited to the amount actually beneficially used for the stated purposes and shall not exceed 20 acre-feet per annum to be collected from December 1 of each year to April 30 of the succeeding year. The maximum withdrawal has been 19 acre-feet.

Unless a change is approved by the State Water Resources Control Board (SWRCB), water used under this license may be diverted, rediverted, stored and used only as specified below;

THE POINT OF DIVERSION OF SUCH WATER IS LOCATED:

North 800 feet and East 950 feet from SW corner of Section 22, T10N, R6W, MDB&M, being within SW $\frac{1}{4}$ of SW $\frac{1}{4}$ of said Section 22.

A DESCRIPTION OF THE LANDS OR THE PLACE WHERE SUCH WATER IS PUT TO BENEFICIAL USE IS AS FOLLOWS:

Within SW $\frac{1}{4}$ of SW $\frac{1}{4}$ of Section 22, T10N, R6W, MDB&M, as shown on map on file with SWRCB.

This license does not authorize collection of water to storage outside of the specified season to offset evaporation and seepage losses or for any other purpose.

Licensee shall maintain an outlet pipe of adequate capacity in his/her dam as near as practicable to the bottom of the natural stream channel, or provide other means satisfactory to the State Water Resources Control Board, in order that water entering the reservoir which is not authorized for appropriation under this license may be released.

The quantity of water diverted under this license is subject to modification by the State Water Resources Control Board if, after notice to the licensee and an opportunity for hearing, the Board finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to Division 7 of the Water Code. No action will be taken pursuant to this paragraph unless the Board finds that (1) adequate waste discharge requirements

have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives can not be achieved solely through the control of waste discharges.

In order to prevent degradation of the quality of water, licensee shall comply with any waste discharge requirements imposed by the California Regional Water Quality Control Board, Central Valley Region, or by the State Water Resources Control Board.

Licensee shall not conduct any mining operations unless waste discharge requirements which have been established by the California Water Quality Control Board, Central Valley Regional Board, are being observed.

Licensee shall comply with the following provisions which are derived from the Condition 12 Settlement Agreement dated March 10, 1995 (Agreement) pursuant to the Sacramento County Superior Court, Judicial Council Coordination Proceeding No. 2565:

(1) Licensee is hereby put on notice that the Sacramento County Superior Court, Judicial Council Coordination Proceeding No. 2565, has retained jurisdiction over the parties and, upon application by the watermaster, has the right to temporarily enjoin the diversion of water under this license for noncompliance with the terms of the Agreement.

(2) The Court has appointed a watermaster to implement the provisions of the Agreement. The licensee shall be responsible for partial payment of the watermaster costs in accordance with the terms of the Agreement.

(3) Licensee may employ existing methods or means of measurement (or alternatively any other standard means of measurement normally acceptable or satisfactory to the SWRCB in its administration of appropriative water rights) for determining the amount of water diverted to storage under this license, unless otherwise specified by the Agreement.

(4) Licensee shall install at licensee's own cost such additional or other measurement devices as are necessary to measure actual depletions, if the watermaster determines that additional measures are necessary, consistent with Section 3.A.3 (Measuring Devices) of the Agreement.

(5) Licensee shall report to the watermaster annually, on or about September 1, the amount of water diverted to storage under this license at the beginning and end of the Accumulation Season as required by the watermaster. Such annual reports shall be made in writing on forms approved by the watermaster.

(6) The watermaster shall have the right to enter to inspect measuring equipment and to observe compliance with the terms and conditions of this license, upon 48-hour prior notice and upon such reasonable conditions as licensee may prescribe.

(7) Licensee is hereby put on notice that there may be years when diversion of water under this license will not be within the reservation of water established for the Putah Creek watershed upstream of Monticello Dam, as set forth in the Agreement and that in those years no water may be available under this license.

(8) In the event Allowable Depletion is exceeded in any year, licensee shall release water diverted to storage to the extent necessary to bring the Allowable Depletion into compliance. Licensee's obligation to release water from storage shall be governed by the repayment provisions of the Agreement. (Agreement pp. 9, 10, and 11)

(9) In any year in which Annual Depletion exceeds Allowable Depletion, if Lake Berryessa: (1) does not drop below 640,000 acre-feet in storage as of May 1, licensee shall have three years, starting in the next Accumulation Season, to make up or repay licensee's excess diversion (2) does not reach 640,000 acre-feet of storage as of May 1, licensee shall have one year, starting in the next Accumulation Season, to make up or repay licensee's excess diversions. In the event that Lake Berryessa spills at any time prior to full payback of excess depletion, licensee shall be excused from any further obligation for repayment of the overage.

(10) Licensee shall provide watermaster prior notice of any repayment. Repayment may be made either by releases from storage, curtailment of direct diversion, or by the provision of water from other sources.

(11) Licensee shall notify the watermaster of any change in ownership of land, changes in the water right, or changes in address related to the license.

(12) Licensee is hereby put on notice of licensee's right, upon reasonable prior notice, to inspect and to copy, at licensee's own expense, all records and reports of the watermaster.

Inclusion in the license of certain provisions of this Agreement shall not be construed as disapproval of other provisions of the Agreement or as affecting the enforceability, as between the parties, of such other provisions insofar as they are not inconsistent with the terms of this license.

(0000024)

The State Water Resources Control Board (SWRCB) shall have continuing authority under Article X, Section 2 of the California Constitution, Water Code Sections 100 and 275, and the common law public trust doctrine over this license to delete, revise, amend, or adopt new terms or conditions to: (1) implement the March 10, 1995 Condition 12 Settlement Agreement and any amendments to the agreement and (2) make the terms or conditions consistent with any order of the superior court. No action shall be taken pursuant to this paragraph unless the SWRCB provides notice to affected parties and provides an opportunity for a hearing.

(0000012)

Licensee shall allow representatives of the Board and other parties, as may be authorized from time to time by the Board, reasonable access to project works to determine compliance with the terms of this license.

All rights and privileges under this license including method of diversion, method of use and quantity of water diverted are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to prevent waste, unreasonable use, unreasonable method of use or unreasonable method of diversion of said water.

Reports shall be filed promptly by licensee on appropriate forms which will be provided for the purpose from time to time by the SWRCB.

The right hereby confirmed to the diversion and use of water is restricted to the point or points of diversion herein specified and to the lands or place of use herein described.

This license is granted and licensee accepts all rights herein confirmed subject to the following provisions of the Water Code:
