

STATE OF CALIFORNIA
THE RESOURCES AGENCY
STATE WATER RESOURCES CONTROL BOARD
DIVISION OF WATER RIGHTS

License for Diversion and Use of Water

APPLICATION 24896

PERMIT 17008

LICENSE 11340

THIS IS TO CERTIFY, That Dorothy L. Erickson
1146 Driver Road, Trinidad, California 95570

has *made proof as of* October 26, 1982 *(the date of inspection)*
to the satisfaction of the State Water Resources Control Board of a right to the use of the water of
An Unnamed Spring in Humboldt County

tributary to Unnamed Stream thence Pacific Ocean

for the purpose of Irrigation and Domestic uses
under Permit 17008 *of the Board and that the right to the use of this water has been perfected*
in accordance with the laws of California, the Regulations of the Board and the permit terms; that the
priority of this right dates from October 3, 1975 *and that the amount of water to which*
this right is entitled and hereby confirmed is limited to the amount actually beneficially used for the stated
purposes and shall not exceed (A) Six hundred (600) gallons per day by direct
diversion from January 1 to December 31 of each year for domestic use; (B) two
thousand seven hundred (2,700) gallons per day by direct diversion from June 1
to October 1 of each year for irrigation use. The equivalent of such
continuous flow allowance for any 30-day period may be diverted in a shorter
time provided there be no interference with other vested rights and instream
beneficial uses; and provided further that all terms or conditions protecting
instream beneficial uses be observed. The maximum amount diverted under this
license for all uses shall not exceed 1.7 acre-feet per year.

THE POINT OF DIVERSION OF SUCH WATER IS LOCATED:

North 1,750 feet and East 2,000 feet from SW corner of Section 32, T8N, R1E,
HB&M, being within NE $\frac{1}{4}$ of SW $\frac{1}{4}$ of said Section 32.

**A DESCRIPTION OF THE LANDS OR THE PLACE WHERE
SUCH WATER IS PUT TO BENEFICIAL USE IS AS FOLLOWS:**

Domestic use and irrigation of 1 acre within SW $\frac{1}{4}$ of SW $\frac{1}{4}$ of Section 32, T8N,
R1E, HB&M, as shown on map on file with State Water Resources Control Board.

The quantity of water diverted under this license is subject to
modification by the State Water Resources Control Board if, after notice to the
licensee and an opportunity for hearing, the Board finds that such modification
is necessary to meet water quality objectives in water quality control plans
which have been or hereafter may be established or modified pursuant to
Division 7 of the Water Code. No action will be taken pursuant to this
paragraph unless the Board finds that (1) adequate waste discharge requirements
have been prescribed and are in effect with respect to all waste discharges
which have any substantial effect upon water quality in the area involved, and
(2) the water quality objectives cannot be achieved solely through the control
of waste discharges.

Licensee shall not exercise any other existing right to the use of water named herein so long as this license remains in effect.

This license shall not be construed as conferring upon the licensee right of access to the point of diversion.

Licensee shall allow representatives of the Board and other parties, as may be authorized from time to time by the Board, reasonable access to project works to determine compliance with the terms of this license.

Pursuant to California Water Code Sections 100 and 275, all rights and privileges under this license, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

This continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this license with a view to minimizing waste of water and to meeting the reasonable water requirements of licensee without unreasonable draft on the source. Licensee may be required to implement such programs as (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this license and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

Reports shall be filed promptly by licensee on appropriate forms which will be provided for the purpose from time to time by the Board.

The right hereby confirmed to the diversion and use of water is restricted to the point or points of diversion herein specified and to the lands or place of use herein described.

This license is granted and licensee accepts all rights herein confirmed subject to the following provisions of the Water Code:

Section 1625. Each license shall be in such form and contain such terms as may be prescribed by the Board.

Section 1626. All licenses shall be under the terms and conditions of this division (of the Water Code).

Section 1627. A license shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code) but no longer.

Section 1628. Every license shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriator of water to whom a license is issued takes the license subject to the conditions therein expressed.

Section 1629. Every licensee, if he accepts a license does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any license granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any licensee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any licensee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).

Section 1630. At any time after the expiration of twenty years after the granting of a license, the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State shall have the right to purchase the works and property occupied and used under the license and the works built or constructed for the enjoyment of the rights granted under the license.

Section 1631. In the event that the State, or any city, city and county, municipal water district, irrigation district, lighting district, or political subdivision of the State so desiring to purchase and the owner of the works and property cannot agree upon the purchase price, the price shall be determined in such manner as is now or may hereafter be provided by law for determining the value of property taken in eminent domain proceedings.
