STATE WATER RESOURCES CONTROL BOARD

DIVISION OF WATER RIGHTS

License for Diversion and Use of Water

APPLICATION 22454
Page 1 of 4

PERMIT 15963

LICENSE **13537**

THIS IS TO CERTIFY, That

Palmer G. Jackson
Trustee of the Palmer Gavit
Jackson Trust U/A dated 2/25/88
1054 Alisal Road
Solvang, CA 93463

has made proof as of **June 8, 1999** (the date of inspection) to the satisfaction of the State Water Resources Control Board (SWRCB) of a right to the use of the waters of **Alisal Creek** in **Santa Barbara County**

tributary to **Santa Ynez River**

for the purpose of **Irrigation, Stockwatering, and Recreational uses**

under Permit **15963** of the SWRCB; that the right to the use of this water has been perfected in accordance with the laws of California, the Regulations of the SWRCB, and the permit terms; that the priority of this right dates from **April 28, 1966**; and that the amount of water to which this right is entitled and hereby confirmed is limited to the amount actually beneficially used for the stated purposes and shall not exceed **one thousand seven hundred thirty (1,730) acre-feet per annum to be collected from November 1 of each year to June 1 of the succeeding year. The maximum withdrawal in any one year shall not exceed 480 acre-feet.**

The capacity of the reservoir covered by this license shall not exceed 2,342 acre-feet.

This license does not authorize collection of water to storage outside of the specified season to offset evaporation and seepage losses or for any other purpose.

THE POINT OF DIVERSION OF SUCH WATER IS LOCATED:

By California Coordinate System of 1983, Zone 5, North 2,028,131 feet and East 5,918,745 feet, being within SW $\frac{1}{4}$ of NW $\frac{1}{4}$ of Section 4, T5N, R31W, SBB&M.

A DESCRIPTION OF THE LANDS OR THE PLACE WHERE SUCH WATER IS PUT TO BENEFICIAL USE IS AS FOLLOWS:

Recreational use at Alisal Reservoir within projected Sections 4 and 5, T5N, R31W, SBB&M, Stockwatering use within Sections 3 and 4, T5N, R31W, SBB&M, and projected Sections 25, 26, 27, 33, 35, and 36, T6N, R31W, SBB&M, and Irrigation as follows:

- 4.0 acres within NW $\frac{1}{4}$ of NW $\frac{1}{4}$ of Section 3, T5N, R31W, SBB&M
- 6.0 acres within NE $\frac{1}{4}$ of NE $\frac{1}{4}$ of Section 4, T5N, R31W, SBB&M

0.9 acre within SE $\frac{1}{4}$ of NE $\frac{1}{4}$ of Section 4, T5N, R31W, SBB&M
4.4 acres within SE $\frac{1}{4}$ of NE $\frac{1}{4}$ of projected Section 33, T6N, R31W, SBB&M
4.0 acres within NE $\frac{1}{4}$ of SE $\frac{1}{4}$ of projected Section 33, T6N, R31W, SBB&M
8.7 acres within SW $\frac{1}{4}$ of NW $\frac{1}{4}$ of projected Section 34, T6N, R31W, SBB&M
1.8 acres within SE $\frac{1}{4}$ of NW $\frac{1}{4}$ of projected Section 34, T6N, R31W, SBB&M
17.0 acres within NW $\frac{1}{4}$ of SW $\frac{1}{4}$ of projected Section 34, T6N, R31W, SBB&M
3.5 acres within NE $\frac{1}{4}$ of SW $\frac{1}{4}$ of projected Section 34, T6N, R31W, SBB&M
11.5 acres within NE $\frac{1}{4}$ of SE $\frac{1}{4}$ of projected Section 34, T6N, R31W, SBB&M
27.7 acres within SE $\frac{1}{4}$ of SE $\frac{1}{4}$ of projected Section 34, T6N, R31W, SBB&M
0.8 acre within SW $\frac{1}{4}$ of NW $\frac{1}{4}$ of projected Section 35, T6N, R31W, SBB&M
32.5 acres within NW $\frac{1}{4}$ of SW $\frac{1}{4}$ of projected Section 35, T6N, R31W, SBB&M
4.7 acres within NE $\frac{1}{4}$ of SW $\frac{1}{4}$ of projected Section 35, T6N, R31W, SBB&M
39.0 acres within SW $\frac{1}{4}$ of SW $\frac{1}{4}$ of projected Section 35, T6N, R31W, SBB&M
8.0 acres within SE $\frac{1}{4}$ of SW $\frac{1}{4}$ of projected Section 35, T6N, R31W, SBB&M

174.5 acres total, as shown on map dated July 1, 2000 filed with the SWRCB.

Licensee shall maintain measuring devices satisfactory to the Chief of the Division of Water Rights in order that accurate measurement can be made of the quantity of water flowing into and out of said reservoir.

(0060046)

During the storage season of November through May, the licensee shall determine and maintain a record of the quantity of water entering the reservoir based on a staff gage or U.S. Geological Survey gage in the reservoir read weekly, and more frequently during storm periods, if practical.

Beginning June 1, the licensee will release all water stored in the current storage season unless the inflow during any consecutive 30-day period of the storage season exceeded 150 acre-feet. If the inflow to the reservoir in any consecutive 30-day period exceeds 150 acre-feet, the licensee shall be entitled to retain all water entering the reservoir during the storage season.

(0070047)

(0100047)

Licensee shall maintain an outlet pipe of adequate capacity in the dam as near as practicable to the bottom of the natural stream channel, or provide other means satisfactory to the Chief of the Division of Water Rights in order that water entering the reservoir which is not authorized for appropriation under this license may be released.

(0050043)

The right hereby confirmed to the diversion and use of water is restricted to the point or points of diversion herein specified and to the lands or place of use herein described.

Reports shall be filed promptly by the licensee on the appropriate forms which will be provided for the purpose from time to time by the SWRCB.

Licensee shall allow representatives of the SWRCB and other parties, as may be authorized from time to time by the SWRCB, reasonable access to project works to determine compliance with the terms of this license.

Pursuant to Water Code sections 100 and 275 and the common law public trust doctrine, all rights and privileges under this license, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the SWRCB in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the SWRCB may be exercised by imposing specific requirements over and above those contained in this license with a view to eliminating waste of water and to meeting the reasonable water requirements of licensee without unreasonable draft on the source. Licensee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this license and to determine accurately water use as against reasonable water requirement for the authorized project. No action will be taken pursuant to this paragraph unless the SWRCB determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the SWRCB also may be exercised by imposing further limitations on the diversion and use of water by the licensee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the SWRCB determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution article X, section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.

The quantity of water diverted under this license is subject to modification by the SWRCB if, after notice to the licensee and an opportunity for hearing, the SWRCB finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to division 7 of the Water Code. No action will be taken pursuant to this paragraph unless the SWRCB finds that: (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot be achieved solely through the control of waste discharges.

This license does not authorize any act which results in the taking of a threatened or endangered species or any act which is now prohibited, or becomes prohibited in the future, under either the California Endangered Species Act (Fish and Game Code sections 2050 to 2097) or the federal Endangered Species Act (16 U.S.C.A. sections 1531 to 1544). If a "take" will result from any act authorized under this water right, the licensee shall obtain authorization for an incidental take prior to construction or operation of the project. Licensee shall be responsible for meeting all requirements of the applicable Endangered Species Act for the project authorized under this license.

If construction or rehabilitation work is required for the diversion works covered by this license within the bed, channel, or bank of the affected water body, the licensee shall enter into a streambed or lake alteration agreement with the State Department of Fish and Game. Licensee shall submit a copy of the agreement, or waiver thereof, to the Division of Water Rights prior to commencement of work. Compliance with the terms and conditions of the agreement is the responsibility of the licensee.

This license is granted and the licensee accepts all rights herein confirmed subject to the following provisions of the Water Code:

Section 1625. Each license shall be in such form and contain such terms as may be prescribed by the SWRCB.

Section 1626. All licenses shall be under the terms and conditions of this division (of the Water Code).

Section 1627. A license shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code) but no longer.

Section 1628. Every license shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article (of the Water Code) and the statement that any appropriator of water to whom a license is issued takes the license subject to the conditions therein expressed.

Section 1629. Every licensee, if he accepts a license, does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any license granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any licensee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any licensee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).

Section 1630. At any time after the expiration of twenty years after the granting of a license, the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State shall have the right to purchase the works and property occupied and used under the license and the works built or constructed for the enjoyment of the rights granted under the license.

Section 1631. In the event that the State, or any city, city and county, municipal water district, irrigation district, lighting district, or political subdivision of the State so desiring to purchase and the owner of the works and property cannot agree upon the purchase price, the price shall be determined in such manner as is now or may hereafter be provided by law for determining the value of property taken in eminent domain proceedings.
