

STATE OF CALIFORNIA  
CALIFORNIA ENVIRONMENTAL PROTECTION AGENCY  
STATE WATER RESOURCES CONTROL BOARD

DIVISION OF WATER RIGHTS

**RIGHT TO DIVERT AND USE WATER**

APPLICATION 13225

PERMIT 11043

Right Holder: Monterey County Water Resources Agency  
P.O. Box 930  
Salinas, CA 93902-0930

The State Water Resources Control Board (State Water Board) authorizes the diversion and use of water by the right holder in accordance with the limitations and conditions herein SUBJECT TO PRIOR RIGHTS. The priority of this right dates from **July 11, 1949**. This right is issued in accordance with the State Water Board delegation of authority to the Deputy Director for Water Rights (Resolution 2012-0029) and the Deputy Director for Water Rights redelegation of authority dated July 6, 2012. This right supercedes any previously issued right on **Application 13225**.

**Right holder is hereby granted a right to divert and use water as follows:**

1. Source of water: **(1) Salinas River**  
tributary to: **(2) Pacific Ocean**  
within the County of **Monterey**

2. Location of points of diversion

By California Coordinate System of 1983 in Zone 4	40-acre subdivision of public land survey or projection thereof	Section (Projected)*	Township	Range	Base and Meridian
<b><u>Eastside Canal Intake:</u></b> North 2,038,821 feet and East 5,891,976 feet	<b>NW ¼ of SW ¼</b>	<b>36</b>	<b>17S</b>	<b>6E</b>	<b>MD</b>
<b><u>Castroville Canal Intake:</u></b> North 2,118,722 feet and East 5,796,575 feet	<b>NW ¼ of NE ¼</b>	<b>23</b>	<b>15S</b>	<b>3E</b>	<b>MD</b>

3. Purpose of use	4. Place of use					
	40-acre subdivision of public land survey or projection thereof	Section (Projected)*	Township	Range	Base and Meridian	Acres
<b>Irrigation</b>	<b>86,500 net acres within a gross of 107,000 acres within portions of Zone 2 of the Monterey County Water Resources Agency</b>					
<b>Municipal</b>	<b>Within portions of Zone 2 of the Monterey County Water Resources Agency</b>					

The place of use is shown on map filed with the State Water Board.

5. The water appropriated under this right shall be limited to the quantity which can be beneficially used and shall not exceed **400 cubic feet per second** by direct diversion to be diverted from January 1 to December 31 of each year. The maximum amount diverted under this right shall not exceed **135,000 acre-feet per year.**  
(000005A)
6. Construction of both the Castroville and Eastside Canal projects shall commence by January 1, 1987.  
(0000007)
7. Construction work on Castroville and Eastside projects shall be completed by December 1, 1988.  
(0000008)
8. Complete application of the water to the authorized use shall be made by December 1, 2008.  
(0000009)
9. Based upon right holder's Arroyo Seco Project implementation schedule, right holder shall:
  - (a) Form assessment district by January 1, 1984
  - (b) File final P.L. 984 loan applications by June 30, 1984  
(0320300)
10. This permit shall stand revoked and of no further effect if right holder fails to meet any of the dates specified unless:
  - (a) Right holder petitions the Board for an extension of time prior to the date in question, and
  - (b) The Board finds good cause for a time extension.  
(0010300)
11. The Board specifically reserves jurisdiction to impose further terms and conditions on this permit requiring right holder to use reclaimed wastewater to satisfy all or some of its water needs should the public interest so require.  
(0000600)
12. Any right which may be consummated under this application and permit is subject to the prior right for municipal use only which the City of Paso Robles may consummate under Application 17123.  
(0000112)

13. Right holder shall not divert water unless the natural flow of the Salinas River at Eastside Canal Intake (NAD 83, Zone 4, North 2,038,821 feet and East 5,891,976 feet) is greater than the amounts listed in the table below. The natural flow shall be calculated by subtracting reservoir releases from Nacimiento and San Antonio Reservoirs from total flows at the Soledad gaging station on a three-day running average.

Month	Amount (cubic feet per second)
January	3.3
February	6.2
March	6.41
April	16.43
May	17.21
June	20.62
July	24.02
August	18.89
September	20.97
October	10.51
November	4.56
December	2.64

(0160300)

14. This permit is subject to timely completion of the following actions towards implementation of Phase II of the Salinas Valley Water Project (Project):
- (a) Submitting a petition for extension of time by October 8, 2013.
  - (b) Issuing a Notice of Preparation for the Project by July 1, 2014.
  - (c) Releasing a Draft Environmental Impact Report for the Project by July 1, 2015.
  - (d) Issuing a draft financing plan for construction and operation of the Project by July 1, 2016.
  - (e) Certifying a Final Environmental Impact Report for the Project by July 1, 2017.
  - (f) Submitting necessary permit applications for regulatory agency approvals for the Project by July 1, 2018.
  - (g) Approving a financing plan for construction and operation of the Project by July 1, 2019.
  - (h) Finalizing Project construction drawings by July 1, 2020.
  - (i) Submitting a financing plan for construction and operation of the Project for public approval by July 1, 2021.
  - (j) Obtaining final permits and other agency approvals for the Project by July 1, 2023.

- (k) Issue notice to proceed with construction of the Project by July 1, 2024.
- (l) Complete construction of the Project and make initial diversion of water under the permit by July 1, 2026.

Right holder shall file documentation of its progress and completion of each milestone with the annual electronic report of water diversion and use. In the event that right holder fails to timely complete a milestone, right holder shall also file a letter by September 1 of the year noted in the milestone, advising the Division of such failure, providing the basis for failing to meet the milestone and identifying when the milestone will be met.

(0270700)

---

**THIS RIGHT IS ALSO SUBJECT TO THE FOLLOWING TERMS AND CONDITIONS:**

- A. Right holder is on notice that: (1) failure to timely commence or complete construction work or beneficial use of water with due diligence, (2) cessation or partial cessation of beneficial use of water, or (3) failure to observe any of the terms or conditions of this right, may be cause for the State Water Board to consider revocation (including partial revocation) of this right. (Cal. Code Regs., tit. 23, § 850.) (0000016)
- B. Right holder is on notice that when the State Water Board determines that any person is violating, or threatening to violate, any term or condition of a right, the State Water Board may issue an order to that person to cease and desist from that violation. (Wat. Code, § 1831.) (0000017)
- C. Right holder is not authorized to make any modifications to the location of diversion facilities, place of use or purposes of use, or make other changes to the project that do not conform with the terms and conditions of this right, prior to submitting a change petition and obtaining approval of the State Water Board. (0000018)
- D. Once the time to develop beneficial use of water ends under this permit, right holder is not authorized to increase diversions beyond the maximum annual amount diverted or used during the authorized development schedule prior to submitting a time extension petition and obtaining approval of the State Water Board. (0000019)
- E. Only the amount of water applied to beneficial use during the authorized diversion season, as determined by the State Water Board, shall be considered when issuing a license. (Wat. Code, § 1610.) (0000006)
- F. Right holder shall maintain records of the amount of water diverted and used under this right to enable the State Water Board to determine the amount of water that has been applied to beneficial use. (0000015)
- G. Right holder shall promptly submit any reports, data, or other information that may reasonably be required by the State Water Board, including but not limited to documentation of water diversion and use under this right and documentation of compliance with the terms and conditions of this right. (0000010)
- H. No water shall be diverted under this right unless right holder is operating in accordance with a compliance plan, satisfactory to the Deputy Director for Water Rights. Said compliance plan shall specify how right holder will comply with the terms and conditions of this right. Right holder shall comply with all reporting requirements in accordance with the schedule contained in the compliance plan. (0000070)
- I. Right holder shall grant, or secure authorization through right holder's right of access to property owned by another party, the staff of the State Water Board, and any other authorized representatives of the State Water Board the following:
  - 1. Entry upon property where water is being diverted, stored or used under a right issued by the State Water Board or where monitoring, samples and/or records must be collected under the conditions of this right;

2. Access to copy any records at reasonable times that are kept under the terms and conditions of a right or other order issued by State Water Board;
3. Access to inspect at reasonable times any project covered by a right issued by the State Water Board, equipment (including monitoring and control equipment), practices, or operations regulated by or required under this right; and,
4. Access to photograph, sample, measure, and monitor at reasonable times for the purpose of ensuring compliance with a right or other order issued by State Water Board, or as otherwise authorized by the Water Code.

(0000011)

- J. This right shall not be construed as conferring right of access to any lands or facilities not owned by right holder.

(0000022)

- K. All rights are issued subject to available flows. Inasmuch as the source contains treated wastewater, imported water from another stream system, or return flow from other projects, there is no guarantee that such supply will continue.

(0000025)

- L. This right does not authorize diversion of water dedicated by other right holders under a senior right for purposes of preserving or enhancing wetlands, habitat, fish and wildlife resources, or recreation in, or on, the water. (Wat. Code, § 1707.) The Division of Water Rights maintains information about these dedications. It is right holders' responsibility to be aware of any dedications that may preclude diversion under this right.

(0000212)

- M. No water shall be diverted or used under this right, and no construction related to such diversion shall commence, unless right holder has obtained and is in compliance with all necessary permits or other approvals required by other agencies. If an amended right is issued, no new facilities shall be utilized, nor shall the amount of water diverted or used increase beyond the maximum amount diverted or used during the previously authorized development schedule, unless right holder has obtained and is in compliance with all necessary requirements, including but not limited to the permits and approvals listed in this term.

Within 90 days of the issuance of this right or any subsequent amendment, right holder shall prepare and submit to the Division of Water Rights a list of, or provide information that shows proof of attempts to solicit information regarding the need for, permits or approvals that may be required for the project. At a minimum, right holder shall provide a list or other information pertaining to whether any of the following permits or approvals are required: (1) lake or streambed alteration agreement with the Department of Fish and Wildlife (Fish & G. Code, § 1600 et seq.); (2) Department of Water Resources, Division of Safety of Dams approval (Wat. Code, § 6002); (3) Regional Water Quality Control Board Waste Discharge Requirements (Wat. Code, § 13260 et seq.); (4) U.S. Army Corps of Engineers Clean Water Act section 404 permit (33 U.S.C. § 1344); and (5) local grading permits.

Right holder shall, within 30 days of issuance of any permits, approvals or waivers, transmit copies to the Division of Water Rights.

(0000203)

- N. Urban water suppliers must comply with the Urban Water Management Planning Act (Wat. Code, § 10610 et seq.). An "urban water supplier" means a supplier, either publicly or privately owned, providing water

for municipal purposes either directly or indirectly to more than 3,000 customers or supplying more than 3,000 acre-feet of water annually.

Agricultural water users and suppliers must comply with the Agricultural Water Management Planning Act (Act) (Water Code, § 10800 et seq.). Agricultural water users applying for a permit from the State Water Board are required to develop and implement water conservation plans in accordance with the Act. An "agricultural water supplier" means a supplier, either publicly or privately owned, supplying more than 50,000 acre-feet of water annually for agricultural purposes. An agricultural water supplier includes a supplier or contractor for water, regardless of the basis of right, which distributes or sells for ultimate resale to customers.

(0000029D)

- O. Pursuant to Water Code sections 100 and 275 and the common law public trust doctrine, all rights and privileges under this right, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the State Water Board may be exercised by imposing specific requirements over and above those contained in this right with a view to eliminating waste of water and to meeting the reasonable water requirements of right holder without unreasonable draft on the source. Right holder may be required to implement a water conservation plan, features of which may include but not necessarily be limited to (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this right and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the State Water Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the State Water Board also may be exercised by imposing further limitations on the diversion and use of water by right holder in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the State Water Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution, article X, section 2; is consistent with the public interest; and is necessary to preserve or restore the uses protected by the public trust.

(0000012)

- P. The quantity of water diverted under this right is subject to modification by the State Water Board if, after notice to right holder and an opportunity for hearing, the State Water Board finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to Division 7 of the Water Code. No action will be taken pursuant to this paragraph unless the State Water Board finds that (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot be achieved solely through the control of waste discharges.

(0000013)

- Q. This right does not authorize any act which results in the taking of a candidate, threatened or endangered species or any act which is now prohibited, or becomes prohibited in the future, under either the California Endangered Species Act (Fish & G. Code, § 2050 et seq.) or the federal Endangered Species Act (16 U.S.C. § 1531 et seq.). If a "take" will result from any act authorized under this right, right holder shall obtain any required authorization for an incidental take prior to construction or operation of the project. Right holder shall be responsible for meeting all requirements of the applicable Endangered Species Act for the project authorized under this right.

(0000014)

---

*This right is issued and right holder takes it subject to the following provisions of the Water Code:*

*Section 1390. A permit shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code), but no longer .*

*Section 1392. Every permittee, if he accepts a permit, does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any permit granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any permittee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any permittee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).*

## PERMIT FOR DIVERSION AND USE OF WATER

AMENDED **PERMIT** 11043

Application 13225 of Monterey County Flood Control and Water Conservation District

P. O. Box 930, Salinas, California 93901

filed on July 11, 1949, has been approved by the State Water Resources Control Board SUBJECT TO VESTED RIGHTS and to the limitations and conditions of this Permit.

Permittee is hereby authorized to divert and use water as follows:

1. Source:	Tributary to:
<u>Salinas River</u>	<u>Pacific Ocean</u>

2. Location of point of diversion:	40-acre subdivision of public land survey or projection thereof	Section	Township	Range	Base and Meridan
<u>Eastside Canal Intake : South 10° East, 3,600 feet from NW corner of Projected Section 36</u>	<u>NW<sup>1</sup>/<sub>4</sub> of SW<sup>1</sup>/<sub>4</sub></u>	<u>36</u>	<u>17S</u>	<u>6E</u>	<u>MD</u>
<u>Castroville Canal Intake : South 63° West, 1,600 feet from NE corner of Projected Section 23</u>	<u>NW<sup>1</sup>/<sub>4</sub> of NE<sup>1</sup>/<sub>4</sub></u>	<u>23</u>	<u>15S</u>	<u>3E</u>	<u>MD</u>

County of Monterey

3. Purpose of use:	4. Place of use:	Section	Township	Range	Base and Meridan	Acres
<u>Municipal</u>	<u>Within portions of Zone 2 of the Monterey County Flood Control and Water Conservation District.</u>					
<u>Irrigation</u>	<u>86,500 net acres within a gross of 107,000 acres within portions of Zone 2 of the Monterey County Flood Control and Water Conservation District as shown on maps on file with the State Water Resources Control Board.</u>					

The place of use is shown on map filed with the State Water Resources Control Board.

5. The water appropriated shall be limited to the quantity which can be beneficially used and shall not exceed 400 cubic feet per second to be diverted from January 1 to December 31 of each year. The maximum amount diverted under this permit shall not exceed 168,538 acre-feet per year. 0000005 ✓
6. The amount authorized for appropriation may be reduced in the license if investigation warrants. 0000006 ✓
7. Construction of both the Castroville and Eastside Canal projects shall commence by January 1, 1987. 0000007 ✓
8. Construction work on Castroville and Eastside projects shall be completed by December 1, 1988. 0000008 ✓
9. Complete application of the water to the authorized use shall be made by December 1, 2008. 0000009 ✓
10. Progress reports shall be submitted promptly by permittee when requested by the State Water Resources Control Board until license is issued. 0000010 ✓
11. Permittee shall allow representatives of the State Water Resources Control Board and other parties as may be authorized from time to time by said Board, reasonable access to project works to determine compliance with the terms of this permit. 0000011 ✓
12. Pursuant to California Water Code Sections 100 and 275, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to prevent waste, unreasonable use, unreasonable methods of use, or unreasonable method of diversion of said water.
- The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to minimizing waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement such programs as (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation. 0000012 ✓
13. The quantity of water diverted under this permit and under any license issued pursuant thereto is subject to modification by the State Water Resources Control Board if, after notice to the permittee and an opportunity for hearing, the Board finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to Division 7 of the Water Code. No action will be taken pursuant to this paragraph unless the Board finds that (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot be achieved solely through the control of waste discharges. 0000013 ✓
14. Based upon permittee's Arroyo Seco Project implementation schedule, permittee shall:
- Form assessment district by January 1, 1984
  - File final P. L. 984 loan applications by June 30, 1984
- 0320300 ✓
15. This permit shall stand revoked and of no further effect if permittee fails to meet any of the dates specified unless:
- Permittee petitions the Board for an extension of time prior to the date in question, and
  - The Board finds good cause for a time extension
- 0010300 ✓

16. The Board specifically reserves jurisdiction to impose further terms and conditions on this permit requiring permittee to use reclaimed wastewater to satisfy all or some of its water needs should the public interest so require.

0000600 ✓

17. To the extent that water available for use under this permit is return flow, imported water, or wastewater, this permit shall not be construed as giving any assurance that such supply will continue.

0000025 ✓

18. Permittee shall consult with the Division of Water Rights and the Department of Water Resources and develop and implement a water conservation program or actions. A progress report on development of the program shall be submitted to the Board within 6 months. The program or proposed actions shall be presented to the Board for approval within one year from the date of this order or such further time as may, for good cause shown, be allowed by the Board.

0000629 ✓

19. Any right which may be consummated under this application and permit is subject to the prior right for municipal use only which the City of Paso Robles may consummate under Application 17123.

0000112 ✓

**This permit is issued and permittee takes it subject to the following provisions of the Water Code:**

Section 1390. A permit shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code), but no longer.

Section 1391. Every permit shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriator of water to whom a permit is issued takes it subject to the conditions therein expressed.

Section 1392. Every permittee, if he accepts a permit, does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any permit granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any permittee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any permittee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).

STATE WATER RESOURCES CONTROL BOARD

*Raymond Wash*  
Chief, Division of Water Rights

STATE OF CALIFORNIA  
STATE WATER RESOURCES CONTROL BOARD

In the Matter of Permits 11043  
and 11044, Issued on Applications  
13225 and 13226,

MONTEREY COUNTY FLOOD CONTROL  
AND WATER CONSERVATION DISTRICT,

Permittee

ORDER: WR 82- 13

SOURCE: Salinas River

COUNTY: Monterey

ORDER GRANTING EXTENSION OF TIME

BY VICE CHAIRMAN MITCHELL:

A hearing having been held pursuant to Section 1410 of the Water Code before the State Water Resources Control Board on August 11, 1982, for the purpose of allowing Monterey County Flood Control and Water Conservation District to show cause why Permits 11043 and 11044 should not be revoked; permittee having appeared at the hearing; the Department of Fish and Game having appeared as an interested party; evidence having been presented and received and having been duly considered, the Board finds as follows:

1. On November 20, 1957, Permits 11043 and 11044 were issued to Monterey County Flood Control and Water Conservation District pursuant to Applications 13225 and 13226. The permits currently authorize appropriation of 400 cubic feet per second (cfs)\* from January 1 to December 31 at two points of diversion on the Salinas River in Monterey County for municipal, irrigation and domestic use.

2. The time authorized in said permits for application of water to beneficial use expired on December 1, 1979, after four extensions of time. A petition for an additional extension was filed on August 17, 1981.

\*Total amount to be diverted under either or both permits.

3. The project originally envisioned by the permittee has changed significantly since issuance of the permits.

4. Board Order WR 76-12 provided for extension of the time to commence construction to December 1, 1979. It also provides that:

"2. Construction shall not commence until further order of the Board upon a hearing and a showing by the permittee that the use of all practicable alternative water supplies, including the use of reclaimed wastewater, have been adequately considered and that permittee has made all reasonable effort to coordinate its water supply decisions with local water pollution control agencies...."

The order is silent regarding timing of the hearing, the studies to be conducted and who was to institute the hearing process.

5. Permittee has been diligent in pursuit of the conditions of Order WR 76-12 in that:

(a) Permittee has investigated reasonable alternative supplies of water including well fields, other dams, the State Water Project, the Corps of Engineers' groundwater studies, and the Arroyo Seco Dam project;

(b) Permittee is cooperating in the investigation of the use of reclaimed wastewater as a source of supply for the Castroville Irrigation Project through membership on a task force coordinating the Monterey Wastewater Reclamation Study. This study will not be completed until 1985. The extended time for completion of this study is beyond the control of permittee.

6. Permittee has adopted a plan for the Arroyo Seco Dam project which includes the Castroville and Eastside Irrigation Projects as integral parts of the main project.

7. It is in the public interest to grant an extension of time in this case because the canal projects will be a useful part of an overall Monterey County water plan and no other agency is known which can make any reasonable use of the water at this time.

8. The Arroyo Seco Dam feasibility study Final Report is relevant to the issues of this hearing and should be admitted into evidence.

9. Since a permittee is no longer required to file a separate application for municipal, domestic, and irrigation uses, it is proper to combine the two permits into one.

10. A portion of the schedule set forth by the permittee should be adopted so that future diligence or the lack thereof may be determined.

NOW THEREFORE IT IS ORDERED:

1. That Permits 11043 and 11044 shall be combined as Permit 11043.

2. The permit shall include all applicable standard permit terms including 8, 10, 11, 12 and 13.\*

3. Based upon permittee's Arroyo Seco Project implementation Schedule, permittee shall:

(a) Form assessment district by January 1, 1984.

(b) File final P. L. 984 loan applications by June 30, 1984.

(c) Commence both Castroville and Eastside Canal project construction by January 1, 1987.

(d) Construction work on Castroville and Eastside projects shall be completed by December 1, 1988.

(e) Complete application of the water to the authorized use shall be made by December 1, 2008.

(4) This permit shall stand revoked and of no further effect if permittee fails to meet any of the dates in Paragraph 3 of this Order, unless:

---

\* The Board maintains a list of standard permit terms. Copies of these may be obtained upon request.

(a) Permittee petitions the Board for an extension of time prior to the date in question, and

(b) The Board finds good cause for a time extension.

4. The Arroyo Seco Feasibility Study Final Report is admitted into evidence in the hearing in this matter.

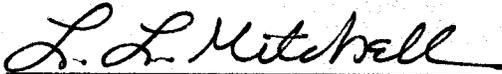

6. In addition, the Board specifically reserves jurisdiction to impose further terms and conditions on Permit No. 11043 (which combines Permits Nos. 11043 and 11044) requiring permittee to use reclaimed wastewater to satisfy all or some of its water needs should the public interest so require.

7. To the extent that water available for use under this permit is return flow, imported water, or wastewater, this permit shall not be construed as giving any assurance that such supply will continue.

8. Permittee shall consult with the Division of Water Rights and the Department of Water Resources and develop and implement a water conservation program or actions. A progress report on development of the program shall be

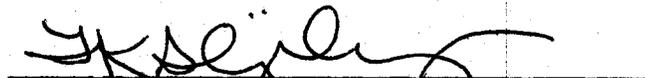

submitted to the Board within six months. The program or proposed actions shall be presented to the Board for approval within one year from the date of this Order or such further time as may, for good cause shown, be allowed by the Board.

Dated: November 18, 1982

  
L. L. Mitchell, Vice Chairman

STATE OF CALIFORNIA  
STATE WATER RESOURCES CONTROL BOARD

In the Matter of Permits 11043  
and 11044, Issued on Applica-  
tions 13225 and 13226, MONTEREY  
COUNTY FLOOD CONTROL AND WATER  
CONSERVATION DISTRICT,  
Permittee.

Order : 76-12  
Source: Salinas River  
County: Monterey

P 11043

ORDER GRANTING EXTENSION OF TIME

BY BOARD MEMBER DODSON:

A hearing having been held pursuant to Section 1410 of the Water Code before the State Water Resources Control Board on the eighth day of July, 1975, in the Resources Building, 1416 Ninth Street, Sacramento, California, for the purpose of allowing Monterey County Flood Control and Water Conservation District, hereinafter called the permittee, to show cause why Permits 11043 and 11044 should not be revoked pursuant to Water Code Section 1410; due notice of the time, place, and nature of said hearing having been given by certified mail to said permittee; said notice having been received, as is evidenced by signed return receipt; said permittee having appeared at said hearing; the Department of Water Resources having appeared as an interested party; evidence having been presented and received at said hearing and having been duly considered, the Board finds as follows:

1. On November 20, 1957, Permit 11043 was issued to Monterey County Flood Control and Water Conservation District on Application 13225. The permit authorized appropriation of 400 cubic feet per second (cfs)\* from January 1 to December 31 at two points of diversion on the Salinas River in Monterey County for municipal purposes. At the same time, Permit 11044 was issued, which is identical to Permit 11043 except that it authorizes irrigation and domestic use of the same water.

2. The time authorized in said permit for application of water to beneficial use expired on December 1, 1973, after three extensions of time. A petition for extension of said time for a period of three years was filed on January 24, 1974.

3. The project originally envisioned by the permittee has changed since issuance of the permits. At the time of hearing, only that portion of the original project known as the Castroville Irrigation Project, which will divert water for irrigation purposes from one of the permitted points of diversion, was being actively pursued (RT 6). However, permittee has not abandoned the other portion of the project, known as the East Side Canal Project, and hopes to develop it in the future (RT 6, 24, 25).

4. Permittee has applied for a federal loan pursuant to Public Law 984 to finance the Castroville Irrigation Project and is very confident that necessary financing will be forthcoming (RT 6, 8, 36). Additionally, permittee has prepared and circulated through the State Clearinghouse an environmental impact report

---

\*Total amount to be diverted under either or both permits.

disclosing the impacts of that project (RT 6). Permittee has not applied for financing for the East Side Canal Project, but may finance that project through a Public Law 984 loan as well (RT 24).

5. Permittee has exercised due diligence in its efforts to obtain financing for the Castroville Irrigation Project portion of its original project and has indicated that the East Side Canal Project remains a sufficiently viable project to justify an extension of time.

6. The Department of Water Resources has found the Castroville area of Monterey County to be "potentially one of the best sites for waste water reclamation in California...". That Department has urged that the Board compel the permittee and the Monterey Peninsula Water Pollution Control Agency (which has applied to the Board for a Clean Water Grant for a regional wastewater treatment facility) to examine more fully the possibility of substituting reclaimed wastewater for the proposed water supply for the Castroville Irrigation Project.

7. The record does not show that permittee has adequately considered the substitution of reclaimed wastewater as suggested by the Department of Water Resources. Failure to make this showing is not considered entirely the fault of the permittee since it does not have comprehensive control over the water resources planning process in Monterey County. However, because the water resources of the State must be put to use to the fullest extent of which they are capable, it is in the public interest to require

permittee to consider further the use of reclaimed wastewater as a supply for the Castroville Irrigation Project. Therefore, construction of the Castroville Irrigation Project or any project utilizing water covered by Permits 11043 and 11044 should not commence until further order of the Board, preceded by a hearing at which permittee demonstrates that all practicable alternatives, including use of reclaimed wastewater, have been fully considered and that permittee has made all reasonable effort to coordinate its water supply decisions with local water pollution control agencies.

8. Permittee also holds Permit 12261 (A16761) which allows rediversion of stored San Antonio River water (tributary to the Salinas River) at the same two points of diversion specified in Permits 11043 and 11044. The development period for Permit 12261 expired on December 1, 1975. Permittee has requested an extension of time for development under Permit 12261, and the Board shall consider conditioning any extension which may be granted to provide for a joint hearing on all three permits.

It is concluded from the foregoing findings that further extension of time until December 1, 1979, is justified.

**NOW THEREFORE IT IS ORDERED:**

1. Time to commence construction under Permits 11043 and 11044 is extended to December 1, 1979.

2. Construction shall not commence until further order of the Board upon a hearing and a showing by the permittee that the use of all practicable alternative water supplies, including

the use of reclaimed wastewater, have been adequately considered and that permittee has made all reasonable effort to coordinate its water supply decisions with local water pollution control agencies. If authorization to commence construction is given, the further Board order will include appropriate standard and special permit terms, including terms concerning the time allowed for completion of construction and for application of water to beneficial use.

Jurisdiction to so condition these permits is reserved.

3. In addition, the Board specifically reserves jurisdiction to impose further terms and conditions on Permits 11043 and 11044 requiring permittee to use reclaimed wastewater to satisfy all or some of its water needs should the public interest so require.

Dated: September 16, 1976

## ORDER APPROVING A NEW DEVELOPMENT SCHEDULE

APPLICATION 13225

PERMIT 11043

THE STATE WATER RESOURCES CONTROL BOARD HAVING DETERMINED THAT GOOD CAUSE HAS BEEN SHOWN FOR EXTENSION OF TIME WITHIN WHICH TO DEVELOP THE PROJECT PROPOSED UNDER PERMIT 11043; AND HAVING DIRECTED THAT THIS ORDER BE ISSUED;

NOW THEREFORE IT IS ORDERED THAT A NEW DEVELOPMENT SCHEDULE BE AND THE SAME IS HEREBY APPROVED AS FOLLOWS:

CONSTRUCTION WORK SHALL COMMENCE ON OR BEFORE DECEMBER 1, 1970

CONSTRUCTION WORK SHALL BE COMPLETED ON OR BEFORE DECEMBER 1, 1972

APPLICATION OF THE WATER TO THE PROPOSED USE SHALL BE COMPLETED ON OR BEFORE DECEMBER 1, 1973

DATED: MAR 22 1968

## ORDER ALLOWING CHANGE IN POINT OF DIVERSION

WHEREAS the State Water Rights Board has found that the change in point of diversion under Application 13225, Permit 11043, for which petition was submitted on June 29, 1962, will not operate to the injury of any other legal user of water, and

WHEREAS the Board has approved and allowed said change and has directed that an order be issued to describe said change in accordance with said petition;

NOW THEREFORE IT IS ORDERED that permission be and the same is hereby granted to change the point of diversion under said Application 13225, Permit 11043, to points of diversion described as follows, to wit:

- (1) EAST SIDE CANAL INTAKE - SOUTH 10° EAST, 3600 FEET FROM NW CORNER OF PROJECTED SECTION 36, T17S, R6E, MDB&M, BEING WITHIN NW $\frac{1}{4}$  OF SW $\frac{1}{4}$  OF SAID SECTION 36.
- (2) CASTROVILLE CANAL INTAKE - SOUTH 63° WEST, 1600 FEET FROM NE CORNER OF PROJECTED SECTION 23, T15S, R3E, MDB&M, BEING WITHIN NW $\frac{1}{4}$  OF NE $\frac{1}{4}$  OF SAID SECTION 23.

WITNESS my hand and the seal of the State Water Rights Board of the State of California this 11th day of October, 1962

*L. K. Hill*

## STATE OF CALIFORNIA—STATE WATER RIGHTS BOARD

AMENDED

Application No. 13225 Filed July 11, 1949 at 10:38 A. M.

(Applicant must not fill in the above blanks)

## APPLICATION TO APPROPRIATE UNAPPROPRIATED WATER

AMENDED APPLICATION RECEIVED MAY 28, 1956

I, Monterey County Flood Control and Water Conservation District  
Name of applicant  
 of Court House, Salinas County of Monterey  
Address  
 State of California

, do hereby make application for a permit to appropriate the following described unappropriated waters of the State of California, *SUBJECT TO VESTED RIGHTS*:

## Source, Amount, Use and Location of Diversion Works

1. The source of the proposed appropriation is Salinas River,  
Give name of stream, lake, etc., if named; if unnamed state nature of source and that it is unnamed  
 located in Monterey County, tributary to Pacific Ocean

2. The amount of water which applicant desires to appropriate under this application is as follows:

(a) For diversion to be directly applied to beneficial use 400 cubic feet per  
See Supplemental Statement. 1 cubic foot per second equals 40 statute miner's inches or 646,317 gallons per day  
 second, to be diverted from January 1 to December 31 of each year.  
Beginning date Closing date

(b) For diversion to be stored and later applied to beneficial use \_\_\_\_\_ acre-feet  
1 acre-foot equals 325,851 gallons  
 per annum, to be collected between \_\_\_\_\_ and \_\_\_\_\_ of each season.  
Beginning date Closing date

NOTE.—Answer (a) or (b) or both (a) and (b) as may be necessary. If amount under (a) is less than .025 cubic foot per second, state in gallons per day. Neither the amount nor the season may be increased after application is filed. If underground storage is proposed a special supplemental form will be supplied by the State Water Rights Board upon request.

3. The use to which the water is to be applied is Municipal  
Domestic, irrigation, power, municipal, mining, industrial, recreational  
 \_\_\_\_\_ purposes.

4. The point of diversion is to be located south 10° east, 3600 feet from the NW corner of  
State bearing and distance or coordinate distances from section or quarter section corner  
Section 36, T17S, R6E, (irregular projected section).

being within the NW¼ of SW¼ Amended by order of 10-11-67  
State 40-acre subdivision of public land survey or projection thereof  
 of Section 36, T. 17S, R. 6E, \_\_\_\_\_ MD B. & M., in the County of Monterey

5. The main conduit terminates in SW¼ of SW¼ of Sec. 3, T. 17S, R. 2E, \_\_\_\_\_ MD B. & M.  
State 40-acre subdivision of U. S. Government survey or projection thereof

## Description of Diversion Works

NOTE.—An application cannot be approved for an amount grossly in excess of the estimated capacity of the diversion works.

6. Intake or Headworks (fill only those blanks which apply)

(a) Diversion will be made by pumping from sump  
Sump, offset well, unobstructed channel, etc.

(b) Diversion will be by gravity, the diverting dam being \_\_\_\_\_ feet in height (stream bed to level of overflow); \_\_\_\_\_ feet long on top; and constructed of \_\_\_\_\_  
Concrete, earth, brush, etc.

(c) The storage dam will be \_\_\_\_\_ feet in height (stream bed to overflow level); \_\_\_\_\_ feet long on top; have a freeboard of \_\_\_\_\_ feet, and be constructed of \_\_\_\_\_  
Concrete, earth, brush, etc.

7. Storage Reservoir \_\_\_\_\_  
Name

The storage reservoir will flood lands in \_\_\_\_\_  
Indicate section or sections, also 40-acre subdivisions unless shown upon map

It will have a surface area of \_\_\_\_\_ acres, and a capacity of \_\_\_\_\_ acre-feet.

In case of insufficient space for answers in form, attach extra sheets at top of page 3 and \_\_\_\_\_ reference.

8. Conduit System (describe main conduits only)

(a) Canal, ditch, flume: Width on top (at water line) 43.5 feet; width at bottom 30  
Cross out two not used

feet; depth of water 4.5 feet; length 206,000 feet; grade 0.022 feet per 1,000 feet; materials  
of construction earth  
Earth, rock, timber, etc.

(b) Pipe line: Diameter \_\_\_\_\_ inches; length \_\_\_\_\_ feet per  
1,000 feet; total <sup>fall</sup> from intake to outlet \_\_\_\_\_ feet; kind \_\_\_\_\_  
Riveted steel, concrete, wood-stave, etc.

NOTE.—If a combination of different sizes or kinds of conduit is to be used, attach extra sheets with complete description and show location of each clearly on map.

9. The estimated capacity of the diversion conduit or pumping plant proposed is 400 cubic feet per second  
State cubic feet per second

The estimated cost of the diversion works proposed is \$2,500,000.  
Give only cost of intake, or headworks, pumps, storage conduits described herein

### Completion Schedule

10. Construction work will begin on or before July 1, 1960

Construction work will be completed on or before July 1, 1962

The water will be completely applied to the proposed use on or before July 1, 1967

### Description of Proposed Use

11. Place of Use. See Supplemental Statement  
State 40-acre subdivisions of the public land survey. If area is unsurveyed indicate the location as if lines of the public land

survey were projected. In the case of irrigation use state the number of acres to be irrigated in each 40-acre tract, if space permits. If space does not permit listing of all 40-acre tracts, describe area in a general way and show detail upon map.

Do(es) applicant(s) own the land whereon use of water will be made? No Jointly? \_\_\_\_\_  
Yes or No Yes or No

District operates for the benefit of its included landowners.

If applicant does not own land whereon use of water will be made, give name and address of owner and state what arrangements have been made with him.

12. Other Rights. Describe all rights except those on file with the State Water Rights Board under which water is served to the above named lands.

Nature of Right (riparian, appropriative, purchased water, etc.)	Year of First Use	Use made in recent years including amount if known	Season of Use	Source of Other Supply
1.				
2.				
3.				
4.				

Attach supplement at top of page 3 if necessary.

13. Irrigation Use. The area to be irrigated is See Supplemental Statement. acres.  
State net acreage to be irrigated

The segregation of acreage as to crops is as follows: Rice \_\_\_\_\_ acres; alfalfa \_\_\_\_\_ acres;  
orchard \_\_\_\_\_ acres; general crops \_\_\_\_\_ acres; pasture \_\_\_\_\_ acres.

NOTE.—Care should be taken that the various statements as to acreage are consistent with each other, with the statement in Paragraph 11, and with the map.

The irrigation season will begin about \_\_\_\_\_ and end about \_\_\_\_\_  
Beginning date Closing date

14. Power Use. The total fall to be utilized is \_\_\_\_\_ feet.  
Difference between nozzle or draft tube water level and first free water surface above

The maximum amount of water to be used through the penstock is \_\_\_\_\_ cubic feet per second.

The maximum theoretical horsepower capable of being generated by the works is \_\_\_\_\_ horsepower.  
Second feet X fall ÷ 5.5

The use to which the power is to be applied is \_\_\_\_\_  
For distribution and sale or private use, etc.

The nature of the works by means of which power is to be developed is \_\_\_\_\_  
Turbine, Pelton wheel, etc.

The size of the nozzle to be used is \_\_\_\_\_ inches.

The water <sup>will</sup> be returned to \_\_\_\_\_ in \_\_\_\_\_ of  
will not Name stream State 40-acre subdivision

## Supplemental Statement

2. (a) Diversion of the unappropriated flow of the Salinas River, up to the amount for which application is made, will be made at any time during the year at which such unappropriated water may be available. Diversion outside of the usual irrigation season will be made for canal seepage, out-of-season irrigation or absorption in local stream channels, which may be used as a part of the distribution system. The applicant intends to recover for reuse all accretions to the ground water within its area of service which may result from its diversions from the surface flow of Salinas River under this application.
10. The use proposed under this application is a part of the general plan of the Monterey County Flood Control and Water Conservation District. It is the plan of the District to defer construction of the works required to use the water to be acquired by this application until the District storage on Nacimiento River has been completed and is in operation. The dates stated are in accordance with this plan.
11. The place of use will be within the portion of Zone 2 of the Monterey County Flood Control and Water Conservation District shown on the accompanying map. It is expected that an additional District Zone will be established to include this area. This application will be used to serve the municipal uses within this area.
13. See Item 2 for discussion of length of season.
15. This application is made jointly and simultaneously with Application 13226 for the same project for irrigation use. Both are applications of the Monterey County Flood Control and Water Conservation District. The same diversion works and conduits will be used. No separate parts of the water supply to be secured will be assigned to irrigation or municipal use. The actual division between these uses of the total supply to be secured will vary from time to time. The District has an equal responsibility to meet the demand for water for both irrigation and municipal use and will not recognize any difference in priority of right between these two uses in its operations. The District desires that permits of simultaneous priority, each covering the full 400 cubic feet per second applied for, be issued under Applications 13225 and 13226, or that one permit for 400 cubic feet per second be issued for joint use for irrigation and municipal purposes.

IMPORTANT

APPLICANT MUST NOT FILL IN BLANKS BELOW

PERMIT No. 11043

certify that the application of which the foregoing is a true and correct copy has been considered and approved by the State Water Rights Board SUBJECT TO VESTED RIGHTS and the following limitations and conditions:

The amount of water appropriated shall be limited to the amount which can be beneficially used, and shall not exceed four hundred (400) cubic feet per second to be diverted from January 1 to December 31 of each year; all as more explicitly set forth in Paragraph 2 (a) of this approved application.

- 2. The maximum amount herein stated may be reduced in the license if investigation so warrants.
- 3. Actual construction work shall begin on or before July 1, 1960, and shall thereafter be prosecuted with reasonable diligence, and if not so commenced and prosecuted this permit may be revoked.
- 4. Said construction work shall be completed on or before July 1, 1962.
- 5. Complete application of the water to the proposed use shall be made on or before July 1, 1967.
- 6. Progress reports shall be filed promptly by permittee on forms which will be provided annually by the State Water Rights Board until license is issued.
- 7. All rights and privileges under this permit including method of diversion, method of use and quantity of water diverted are subject to the continuing authority of the State Water Rights Board in accordance with law and in the interest of the public welfare to prevent waste, unreasonable use, unreasonable method of use or unreasonable method of diversion of said water.
- 8. The total combined amount diverted under Application 13225 and 13226 shall not exceed 400 cubic feet per second.
- 9. Any right which may be consummated under this application and permit is subject to the prior right for municipal use only which the city of Paso Robles may consummate under Application 17123.

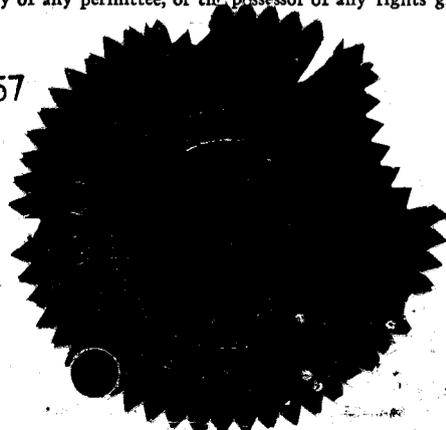

This permit is issued and permittee takes it subject to the following provisions of the Water Code:

Section 1390. A permit shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code), but no longer.

Section 1391. Every permit shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriator of water to whom a permit is issued takes it subject to the conditions therein expressed.

Section 1392. Every permittee, if he accepts a permit, does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any permit granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any permittee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any permittee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).

15. Municipal Use. This application is made for the purpose of supplying water Soledad,  
Name city or cities, town or towns. Urban areas only  
Gonzales and unincorporated urban areas having a present population of 55,000

The estimated average daily consumption during the month of maximum use at the end of each five-year period until the full amount applied for is put to beneficial use is as follows:

See Supplemental Statement.

16. Mining Use. The name of the mining property to be served is \_\_\_\_\_  
Name of claim  
and the nature of the mines is \_\_\_\_\_  
Gold placer, quartz, etc.

The method of utilizing the water is \_\_\_\_\_

It is estimated that the ultimate water requirement for this project will be \_\_\_\_\_  
Cubic feet per second, gallons per minute. State basis of estimate

The water will be polluted by chemicals or otherwise \_\_\_\_\_  
will not Explain nature of pollution, if any

and it will be returned to \_\_\_\_\_ in \_\_\_\_\_ of  
will not Name stream State 40-acre subdivision  
Sec. \_\_\_\_\_, T. \_\_\_\_\_, R. \_\_\_\_\_, B. & M. \_\_\_\_\_

17. Other Uses. The nature of the use proposed is \_\_\_\_\_  
Industrial, recreational, domestic, stockwatering, fish culture, etc.

State basis of determination of amount needed. \_\_\_\_\_  
Number of persons, residences, area of domestic lawns and gardens, number and kind of stock, type

Industrial use, and unit requirements.

### General

18. Are the maps as required by the Rules and Regulations filed with Application? Yes If not,  
Yes or No  
state specifically the time required for filing same \_\_\_\_\_

19. Does the applicant own the land at the proposed point of diversion? No If not, give name and  
Yes or No  
address of owner and state what steps have been taken to secure right of access thereto owned by Nettie Doud  
Baker, et al. 177 Van Buren Street, Monterey, California District has power of  
condemnation.

20. What is the name of the post office most used by those living near the proposed point of diversion?  
\_\_\_\_\_

21. What are the names and addresses of claimants of water from the source of supply below the proposed point of diversion? There are many owners of wells pumping from the ground water supplied, in  
part, by the flow of Salinas River. The lands on which such wells are located are  
\_\_\_\_\_ the boundaries of the Applicant District.
