ORDER APPROVING A NEW DEVELOPMENT SCHEDULE, AND AMENDING THE PERMIT

**WHEREAS:**

1. A petition for extension of time within which to develop the project and apply the water to the proposed use has been filed with the State Water Resources Control Board.
2. The permittee has proceeded with diligence and good cause has been shown for extension of time.

NOW, THEREFORE, IT IS ORDERED THAT:

1. Paragraph 4 of the permit is amended to read as follows:

COMPLETE APPLICATION OF THE  
WATER TO THE PROPOSED USE  
SHALL BE MADE ON OR BEFORE

December 1, 1986

2. Paragraph 6 of this permit is deleted. A new Paragraph 6 is added as follows:

Pursuant to California Water Code Sections 100 and 275, and the public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses, prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to minimizing waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement such programs as (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) to installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action takes into account the public interest and is necessary to protect public trust uses. All such actions shall conform to the standard of reasonableness contained in Article X, Section 2 of the California Constitution.

(0000012)

3. Paragraph 9 be added to the permit as follows:

Permittee shall install, maintain and operate accurate water measuring devices which indicate the instantaneous flow rate and total accumulated flow volume of water diverted to assure compliance with the conditions and limitations of this permit and License 4061. Devices may be continuous recording type or a non-recording type may be used if read daily and the readings are recorded. Recordings or daily readings shall be submitted annually. Permittee shall submit specifications for the measuring devices and a plan for their installation for Board approval by October 1, 1984. Completion of installation of the measuring devices shall be submitted to the Board by April 1, 1985.

(0060999)

4. Paragraph 10 be added to the permit as follows:

Each year, prior to initiation of diversions but not later than April 1, permittee shall furnish to the Board a map specifically designating the net 581.1 acres to be irrigated pursuant to this permit and the net 664.2 acres to be irrigated pursuant to License 4061.

5. Paragraph 11 be added to the permit as follows:

Permittee shall each year prior to initiation of diversions, but not later than April 1, furnish the Board the location of the alternate source(s) of water to be used in the months of July and August to serve the net irrigated acres shown in paragraph 10 of this permit.

6. Paragraph 12 be added to the permit as follows:

Permittee shall each year at the completion of the irrigation season, but not later than December 1, furnish the Board with: (a) the actual alternate source used and (b) the actual acres served during the past months of July and August.

7. Unless permittee implements and meets the conditions, time phases and deadlines shown in the above order items 3 through 6 (Permit paragraphs 9 through 12), the permit is subject to immediate proceedings under Chapter 12 of the Water Code.
