

STATE OF CALIFORNIA  
 CALIFORNIA ENVIRONMENTAL PROTECTION AGENCY  
 STATE WATER RESOURCES CONTROL BOARD

**DIVISION OF WATER RIGHTS**

**PERMIT FOR DIVERSION AND USE OF WATER**

**PERMIT 20835**

Application 29161 of Camp Emmanuel, Inc.

Post Office Box 309, Creston, CA 93432

filed on December 29, 1987, has been approved by the State Water Resources Control Board  
 SUBJECT TO PRIOR RIGHTS and to the limitations and conditions of this permit.

Permittee is hereby authorized to divert and use water as follows:

- |  |  |
|--|--|
| 1. Source:<br><br><u>Middle Branch Huerhuero Creek Underflow</u><br><br>_____<br><br>_____ | Tributary to:<br><br><u>Huerhuero Creek thence</u><br><br><u>Salinas River</u><br><br>_____<br><br>_____ |
|--|--|

2. Location of point of diversion:	40-acre subdivision of public land survey or projection thereof	Section	Township	Range	Base and Meridian
<u>Direct Diversion and Diversion to Offstream Storage</u>					
South 1,300 feet from NW corner of Section 31	NE $\frac{1}{4}$ of NE $\frac{1}{4}$	36	28S	13E	MD
<u>Offstream Storage</u>					
Reservoir No. 1	NW $\frac{1}{4}$ of NW $\frac{1}{4}$	31	28S	13E	MD
Reservoir No. 2	NW $\frac{1}{4}$ of NW $\frac{1}{4}$	31	28S	13E	MD

County of San Luis Obispo

3. Purpose of use:	4. Place of use:	Section	Township	Range	Base and Meridian	Acres
Fire Protection						
Recreational	Reservoir No. 1 in NW $\frac{1}{4}$ of NW $\frac{1}{4}$	31	28S	14E	MD	
	Reservoir No. 2 in NW $\frac{1}{4}$ of NW $\frac{1}{4}$	31	28S	14E	MD	
Domestic	NW $\frac{1}{4}$ of NW $\frac{1}{4}$ and E $\frac{1}{2}$ of NW $\frac{1}{4}$	31	28S	14E	MD	
Irrigation	SE $\frac{1}{4}$ of NW $\frac{1}{4}$	31	28S	14E	MD	9
	N $\frac{1}{2}$ of NW $\frac{1}{4}$	31	28S	14E	MD	13
					TOTAL	22

The place of use is shown on map on file with the State Water Resources Control Board.

5. The water appropriated shall be limited to the quantity which can be beneficially used and shall not exceed (a) by direct diversion: (1) 0.04 cubic foot per second from January 1 to December 31 of each year for domestic purposes; (2) 0.3 cubic foot per second from April 1 to October 30 of each year for irrigation purposes, and (b) by storage: 20 acre-feet per annum to be collected from January 1 to December 31 of each year as follows: (1) 4 acre-feet per annum in Reservoir No.1, (2) 7 acre-feet per annum in Reservoir No. 2 and (3) 9 acre-feet per annum replenishment. The maximum amount diverted under this permit for all uses shall not exceed 96 acre-feet per annum. (0000005)

The maximum rate of diversion to offstream storage shall not exceed 0.9 cubic foot per second. (000005J)

6. The amount authorized for appropriation may be reduced in the license if investigation warrants. (0000006)

7. Construction work shall be prosecuted with reasonable diligence and shall be completed by December 31, 2001. (0000008)

8. Complete application of the water to the authorized use shall be made by December 31, 2005. (0000009)

9. Progress reports shall be submitted promptly by permittee when requested by the State Water Resources Control Board until a license is issued. (0000010)

10. Permittee shall allow representatives of the State Water Resources Control Board and other parties, as may be authorized from time to time by said Board, reasonable access to project works to determine compliance with the terms of this permit.

(0000011)

11. Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest; and is necessary to preserve or restore the uses protected by the public trust.

(0000012)

12. The quantity of water diverted under this permit and under any license issued pursuant thereto is subject to modification by the State Water Resources Control Board if, after notice to the permittee and an opportunity for hearing, the Board finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to Division 7 of the Water Code. No action will be taken pursuant to this paragraph unless the Board finds that (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot be achieved solely through the control of waste discharges.

(0000013)

13. During the season specified in this permit, the quantity and rate of water directly diverted and used under this permit and under permittee's claimed riparian right for the place of use specified in the permit shall not exceed the quantity and rate of direct diversion and use, respectively, specified in this permit. If the permittee's claimed riparian right is quantified at some later date as a result of an adjudication or other legally binding proceeding, the quantity and rate of direct diversion and use allowed under this permit shall be the net of the face value of the permit less the amounts of water available under the riparian right.

Permittee shall forfeit all rights under this permit if permittee transfers all or any part of the claimed riparian right for the place of use covered by this permit to another place of use without the prior approval of the State Water Resources Control Board.

Permittee shall take and use water under the riparian right claimed by permittee only in accordance with law. (0000021)

14. The equivalent of the authorized continuous flow allowance for any 30-day period may be diverted in a shorter time, provided there is no interference with other rights and instream beneficial uses, and provided further that all terms and conditions protecting instream beneficial uses are observed. (0000027)

15. Permittee shall install and maintain a meter satisfactory to the State Water Resources Control Board to measure the instantaneous rate of diversion and cumulative quantity of water diverted under this permit. A record of such measurements shall be maintained by the permittee, and submitted to the SWRCB with the annual "Progress Report by Permittee". (0100047)

This permit is issued and permittee takes it subject to the following provisions of the Water Code:

Section 1390. A permit shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code), but no longer.

Section 1391. Every permit shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriator of water to whom a permit is issued takes it subject to the conditions therein expressed.

Section 1392. Every permittee, if he accepts a permit, does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any permit granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any permittee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any permittee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).

Dated: April 2, 1996
