

**STATE OF CALIFORNIA
CALIFORNIA ENVIRONMENTAL PROTECTION AGENCY
STATE WATER RESOURCES CONTROL BOARD**

DIVISION OF WATER RIGHTS

PERMIT FOR DIVERSION AND USE OF WATER

PERMIT 21069

Application 30622 of **Monika and James B. Miller**
David L. Harshbarger
P.O. Box 3544
Mammoth Lakes, CA 93546

filed on **May 30, 1997**, has been approved by the State Water Resources Control Board (SWRCB) **SUBJECT TO PRIOR RIGHTS** and to the *limitations and conditions of this permit.*

Permittee is hereby authorized to divert and use water as follows:

1. Source of water

Source <u>Unnamed Spring (aka Stream #1)</u> <hr/> <hr/> <hr/>	Tributary to <u>Unnamed Stream thence</u> <hr/> <u>Crooked Creek thence</u> <hr/> <u>Lake Crowley thence</u> <hr/> <u>Owens River thence</u> <hr/> <u>Owens Lake</u> <hr/>
---	---

within the County of **Mono**

2. Location of point of diversion

By California Coordinate System in Zone 3	40-acre subdivision of public land survey or projection thereof	Section (Projected)*	Township	Range	Base and Meridian
N 386,900; E 2,517,300 feet	NW ¼ of NW ¼	6	5S	30E	MD

3. Purpose of use	4. Place of use	Section (Projected)*	Township	Range	Base and Meridian	Acres
Irrigation	SW ¼ of SW ¼	31	4S	30E	MD	17
	SE ¼ of SE ¼	36	4S	29E	MD	1
	NW ¼ of SW ¼	31	4S	30E	MD	2
Fire Protection						

The place of use is shown on map on file with the SWRCB.

5. The water appropriated shall be limited to the quantity which can be beneficially used and shall not exceed 0.05 cubic feet per second to be diverted from May 1 to October 31 of each year. The maximum amount diverted under this permit shall not exceed 15 acre-feet per year. (000005A)
6. Complete application of the water to the authorized use shall be made by December 31, 2010. (0000009)
7. This permit shall not be construed as conferring upon the permittee right of access to the point of diversion. (0000022)
8. The Permittee shall obtain all necessary federal, state and local agency permits required by other agencies prior to construction and diversion of water. Copies of such permits and approvals shall be forwarded to the Chief, Division of Water Rights. (0000203)
9. Should any buried archeological materials be uncovered during project activities, such activities shall cease within 100 feet of the find. Prehistoric archeological indicators include: obsidian and chert flakes and chipped stone tools; bedrock outcrops and boulders with mortar cups; and locally darkened midden soils containing some of the previously listed items plus fragments of bone and fire affected stones. Historic period site indicators generally include: fragments of glass, ceramic and metal objects; milled and split lumber; old trails; and structure and feature remains such as building foundations and dumps. The Chief of the Division of Water Rights shall be notified of the discovery and a professional archeologist shall be retained by the applicant to evaluate the find and recommend appropriate mitigation. Project related activities in the area of the find shall resume only after the completion of the recommended mitigation, as approved by the Chief of the Division of Water Rights. (0380500)

10. For the protection of prior rights permittee shall by-pass 75 gallons per minute. Permittee shall by-pass the total streamflow whenever it is less than 75 gallons per minute. Permittee shall by-pass additional water if 75 gallons per minute is insufficient to satisfy the reasonable beneficial uses of prior right holders.

(0160400)

11. Before starting construction, permittee shall submit for approval by the Chief of the Division of Water Rights, plans and specifications for a measuring and diversion device, which is capable of (a) bypassing the first 75 gallons per minute, (b) diverting the next 22.5 gallons per minute, and (c) bypassing all flows in excess of 97.5 gallons per minute, during the said diversion season.

The plans shall include (a) a gauge on the diversion pipe to measure the instantaneous rate of diversion flow, and (b) a gauge on the 75-gallon bypass pipe or structure to measure the instantaneous rate of bypass flow. Such gauges shall be visible at all times and shall measure in gallons per minute or cubic feet per second. Permittee shall install and properly maintain all measuring and diversion devices satisfactory to the State Water Resources Control Board.

(0550900)

12. Permittee shall convey water diverted under this permit via pipeline from the point of diversion to the place of use.

(0020900)

ALL PERMITS ISSUED BY THE STATE WATER RESOURCES CONTROL BOARD ARE SUBJECT TO THE FOLLOWING TERMS AND CONDITIONS:

- (A) Permittee shall maintain records of the amount of water diverted and used to enable SWRCB to determine the amount of water that has been applied to beneficial use pursuant to Water Code section 1605.
- (B) The amount authorized for appropriation may be reduced in the license if investigation warrants.
- (C) Progress reports shall be submitted promptly by permittee when requested by the SWRCB until a license is issued.
- (D) Permittee shall allow representatives of the SWRCB and other parties, as may be authorized from time to time by said SWRCB, reasonable access to project works to determine compliance with the terms of this permit.

- (E) Pursuant to California Water Code sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of SWRCB in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the SWRCB may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without *unreasonable draft on the source*. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate *agricultural tailwater or to reduce return flow*; (4) *suppressing evaporation losses from water surfaces*; (5) *controlling phreatophytic growth*; and (6) *installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project*. No action will be taken pursuant to this paragraph unless the SWRCB determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are *appropriate to the particular situation*.

The continuing authority of the SWRCB also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the SWRCB determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest; and is necessary to preserve or restore the uses protected by the public trust.

- (F) The quantity of water diverted under this permit and under any license issued pursuant thereto is subject to modification by the SWRCB if, after notice to the permittee and an opportunity for hearing, the SWRCB finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to Division 7 of the Water Code. No action will be taken pursuant to this paragraph unless the SWRCB finds that (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot be achieved solely through the control of waste discharges.

- (G) This permit does not authorize any act which results in the taking of a threatened or endangered species or any act which is now prohibited, or becomes prohibited in the future, under either the California Endangered Species Act (Fish and Game Code sections 2050 to 2097) or the federal Endangered Species Act (16 U.S.C.A. sections 1531 to 1544). If a "take" will result from any act authorized under this water right, the permittee shall obtain authorization for an incidental take prior to construction or operation of the project. Permittee shall be responsible for meeting all requirements of the applicable Endangered Species Act for the project authorized under this permit.

This permit is issued and permittee takes it subject to the following provisions of the Water Code:

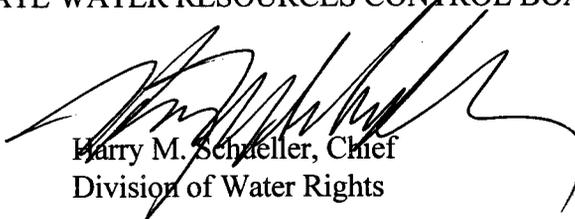

Section 1390. A permit shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code), but no longer.

Section 1391. Every permit shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriator of water to whom a permit is issued takes it subject to the conditions therein expressed.

Section 1392. Every permittee, if he accepts a permit, does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any permit granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any permittee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any permittee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).

Dated: OCT 23 2000

STATE WATER RESOURCES CONTROL BOARD

Harry M. Schaeffer, Chief
Division of Water Rights
