

Attn: Dayle Bowyer

Hi Dayle,

I'd like to express my opposition to including paved bike and walking paths to the MRP order that would require permeable surfaces or treatment to water, before it is released into the larger water supply. In this time of ever-shrinking government budgets, this would put too much of a burden on local municipalities, for very little gain. We don't need another hurdle when it comes to getting new trails built, especially as we try to get more people to participate in healthy outdoor activities.

Thanks for your consideration,

Chris Kangas
